BENNON

Introducing the new BENNON logo

Ready for tomorrow

Our mission and vision is to bring products that simplify the daily work and life of our machrs. That is why we are looking for new ways and directions to improve our products.

Everything clearly and in one place, this is our new catalog. You will now find in it both work, safety and leisure footwear as well as clothing and accessories.

The significant change we want to inform you about is that all of our products will now be uniformly manufactured under the BENNON brand and with a new modern logo. These are changes compared to previous years.

What does not change, however, is our approach to what and how we do.

We all spend most of the day in shoes. The quality of the shoes has a significant impact on our health. The footwear affects the posture, the condition of the spine as well as the muscles of the entire musculoskeletal system.

That's why BENNON brand emphasizes on high quality soles, insoles health and hygiene benefits, comfortable and spacious shoe interior and many functional improvements.

For several years, we have also been a manufacturer of work and leisure clothing. It is very important for us that the clothing is as comfortable to wear as possible, does not restrict movement and is also durable.

You can find in separate sections t-shirts, jackets, sweatshirts, pants, shorts and necessary accessories.

As we adhere to the Baťa tradition, we have our own research and development team of specialists that designs shoes and clothes for you in our modern laboratory (for more see BENNON LAB). Our team also thoroughly tests, analyzes and further improves the BENNON products.

When testing and developing new products, we are based on the requirements of applicable standards. However, in many ways we try to overcome the standards because we want to go beyond the limits, common characteristics and established standards.

That is why we use more and more often the state-of-the-art materials (e.g., CORDURA, VIBRAM, etc.). We follow the wishes and preferences of our customers as well as the latest trends so that we can offer each of you the best.

Robert Kunorza
CEO

VIBRAM

is the market leader in high quality soles. The typical yellow octagon has symbolized quality, innovation, design, safety, and high utility value for over 80 years. In the production of Vibram soles, the most modern mixtures are used, corresponding to the specific needs of users about current design trends.

CORDURA

is a very strong technical fabric, which is characterized by exceptional resistance to tearing and abrasion. It is therefore used wherever high resistance to mechanical damage and long life are required. Cordura is three times more durable than polyester, twice as durable as classic nylon.

VOLT-REX

is an all-reflective material that ensures that you will be seen in the dark and in the dusk when you are exposed. Another advantage is that it has a reduced amount of sewing, which prevents bruising and thus increases wearing comfort.

PUTEK

is a new, extremely durable material used in the manufacture of footwear, which combines high abrasion resistance with extreme lightness. In real terms, this means that it can withstand more than 950,000 cycles in abrasion tests, which is much more than the best fabric, which has an average abrasion resistance of 51,000 cycles.

TPU components

(Made of thermoplastic polyurethane) are flexible and at the same time very strong abrasion-resistant parts of footwear, which have a supporting, firming and protective effect. You can find them on Bennon shoes, for example, in the toe, heel or ankle.

ATOP

is a system of fast and equally closing of shoes without lengthy lacing. You get dressed, turn the wheel, and walk.

SOLE-FIX

special arrangement of the closing system, thanks to which there is a much better fixation of the foot in the shoe.

ANKLE PROTECTOR

is a certified robust rubber component that protects the sensitive area of the ankle from injuries on both sides of the shoe.

REGI-TEX

There is a waterproof membrane inside the shoe, which is made of a very thin layer of expandable Pe (polyethylene), containing about 1.4 billion pores / cm². Each pore of the membrane is 20,000 times smaller than a drop of water, which limits the ability of water to permeate the material, making the shoe waterproof. the shoes have very good breathability and vapor permeability. Thanks to this membrane, the footwear has a favorable microclimate for the feet.

INSOLE

not only the outsoles, but also the quality of the insoles significantly affect the health of the feet. That's why we've developed our own insoles, which are designed to preserve the natural function of the feet (support of the transverse and longitudinal arches, shock absorption in the heel area) and to reduce unpleasant odors. We use anatomically shaped heel bowls, activated carbon or, for example, the new innovative eCoRn technology.

eCORN

is a new innovative technology that acts as a damping system under static and dynamic loads. Many particles called eCoRn are technologically combined into a uniform mass, the great advantage of which is that it has up to 60% greater damping effect than other commonly used technologies.

LIFLEX

is a brand new blade that protects the foot from punctures. Unlike other types of foils, however, it is extremely flexible and ultra-light, so you feel as if it is not even in your shoes. It is made of UHMWPe fibers (high molecular weight polyethylene fibers).

BENNON LAB

To keep up and be a full part of modern footwear industry, we invest in innovative technologies. We have opened a new laboratory that will move us in the speed of development and improve the quality control process.

We exceed the limits of common properties and standards, and thus make the longevity of footwear and clothing longer.

BENNON
product
quality
symbol

We test the quality of footwear and clothing

Bend the whole shoe

Bending testing of the entire shoe. Walking simulation - 200,000 bends = 30 days of continuous walking.

Antistatics and ESD

Testing of antistatic and ESD properties of footwear, insoles and soles.

Dynamic water resistance

Testing of dynamic water resistance in membrane shoes.

Tensile strength and further tearing

Material strength testing during stretching.

Abrasion resistance - Martindale

Friction resistance testing of materials. Abrasion simulation.

Static water resistance

Testing of static water resistance and construction properties.

Vapor permeability

Water vapor permeability testing.

Lighting-box

Testing of color fastness and the effect of UV radiation on materials.

Vertical band saw

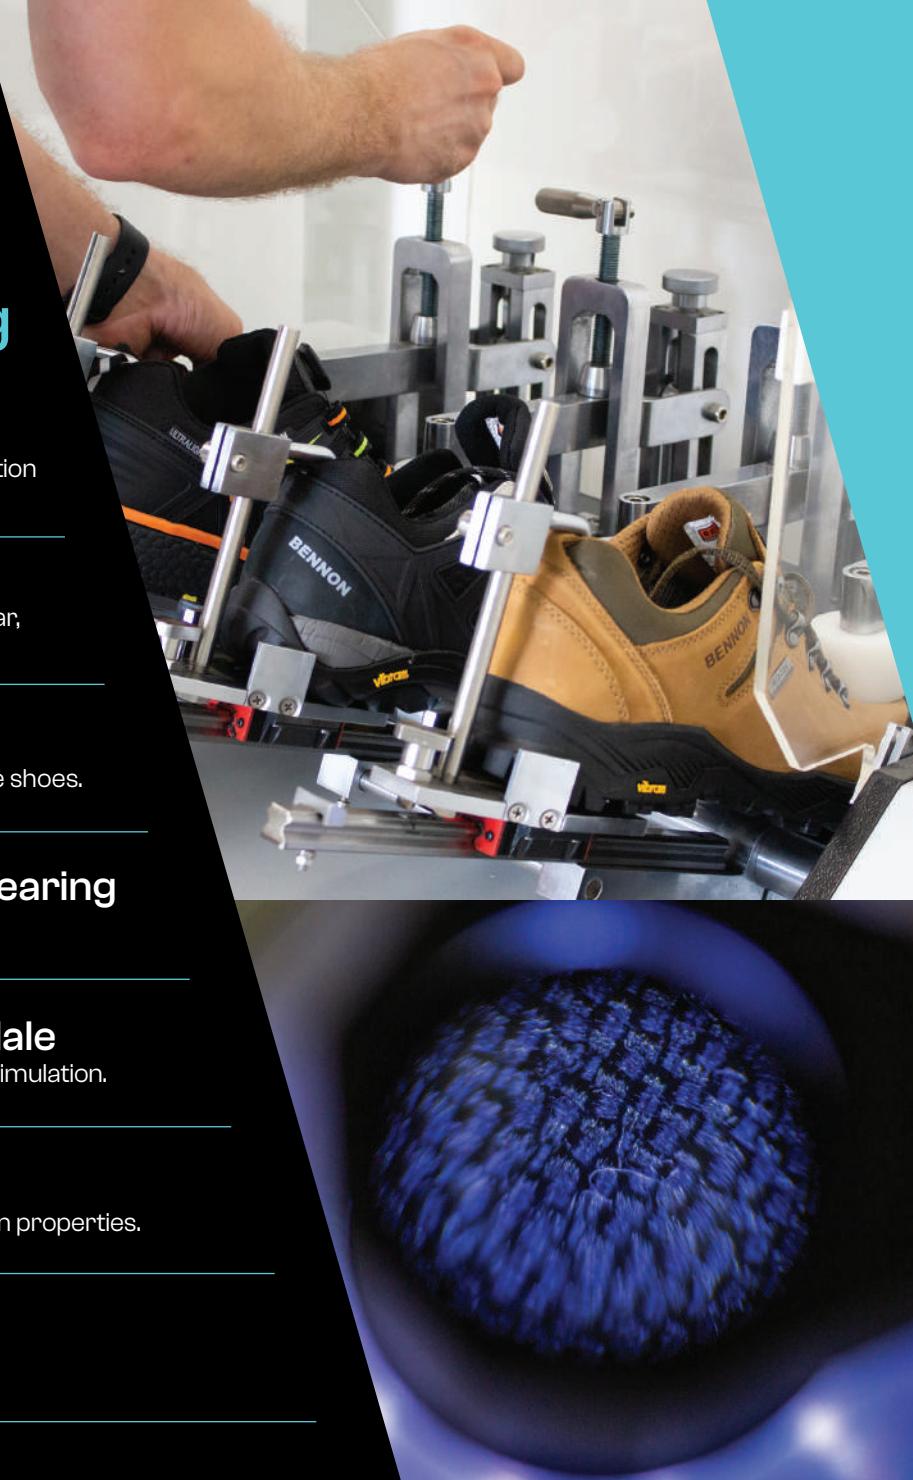

Verification of the correct construction and technology of footwear.

Water column

Pressure resistance testing of membrane materials.

Dynamic testing of materials

Testing of shoe upper materials. Simulation of mechanical stress.

ANKLE PROTECTOR (AN)

Ankle protector:

ANTISTATIC (A)

Antistatic footwear, range 100 kΩ–1000 MΩ.

HEAT INSULATION (HI)

Resistance of the lower part of the shoe against contact heat.

HEAT RESISTANCE (HRO)

Outsole resistance to contact heat up to 300 °C.

WATER RESISTANCE

Water resistance of the upper.

ENERGY ABSORPTION (E)

Energy absorption in the heel area - min. 20 J.

FUEL OIL RESISTANCE (FO)

Outsole resistance to fuel oils.

COLD INSULATION (CI)

Cold resistance of the bottom of the shoe.

PROTECTIVE TOE CAP

Protective toe cap for finger protection. More on page 14.

PENETRATION RESISTANCE (P)

Penetration resistance of the bottom of the shoe.

More on page 14.

SLIP RESISTANCE (SR)

Anti-slip properties of footwear. More on page 14.

NON METALLIC

Non Metallic shoes without metal parts.

ULTRALIGHT

Designation of footwear that is lighter than average footwear.

REFLEX

Reflective element.

ELECTROSTATIC DISCHARGE

Antistatic footwear with ESD properties.

WASHABILITY

Washability 30 °C.

HAND MADE

The shoes are made by hand.

VOLT-REX

Significantly improves user visibility.

VIBRAM

Branded soles in the TREK and TACTICAL collection.

OUTSOLES

Own soles with a comfortable inner space.
Spartacus, Odyssea, Cronus and Proteus.

LIST OF PENETRATION PLATES

P

Outsole resistance against penetration, insures nonmetallic LIFLEX plate, 1100 N

P

Outsole resistance against penetration, insures nonmetallic kevlar plate, 1100 N

P

Outsole resistance against penetration, insures steel plate, 1100 N

LIST OF SLIP RESISTANT

SRA

Slip resistance tested on a ceramic tile wetted with dilute soap solution

SRC

Slip resistance tested on a smooth steel tile wetted with glycerol

LIST OF PROTECTIVE TOE CAPS

CARBON

Safety, non-metallic toecap for better safety of toes from carbon fibers

NANO

Safety, non-metallic toecap for better safety of toes from NANO carbon fibers

COMPOSITE

Safety, non-metallic toecap for better safety of toes from composite fibers

ALUMINIUM

Safety toecap for better safety of toes from aluminium

STEEL

Safety toecap for better safety of toes from steel

SAFETY SHOES ACCORDING TO EN ISO 20345

EN ISO 20347 OB basic requirements (such as safety toe cap, ergonomic specific characteristics, anti-slip properties, etc.)

EN ISO 20347 O1 as SB + closed heel part, antistatic, energy absorption in heel part

EN ISO 20347 O2 as S1 + water penetration and absorption

EN ISO 20347 O3 as S2 + perforation resistance + profiled outsole

WORK SHOES ACCORDING TO EN ISO 20347

EN ISO 20345 SB basic requirements (such as specific ergonomic characteristics, anti-slip properties, etc.)

EN ISO 20345 S1 as OB + closed heel part, antistatic, energy absorption in heel part

EN ISO 20345 S2 as O1 + water penetration and absorption

EN ISO 20345 S3 as O2 + perforation resistance

BREATHABLE

BREATHABLE

Breathability is the ability of a material to permeate, wick away moisture produced by the human body.

FLEXIBILITY

FLEXIBILITY

Flexibility is the ability of a material to adapt to your physical activities without restriction.

WATER REPEL

WATER REPELLENT

It is the ability to withstand water (rain) for some time. Thus, the material does not absorb water immediately, but creates protection on the surface of the material, creating isolated drops.

WATERPROOF

WATERPROOF

waterproof products that have a special membrane that does not let water in or under pressure.

WINDPROOF

WINDPROOF

The ability of the material to prevent airflow from entering the body.

ABRASION
RESISTANCE

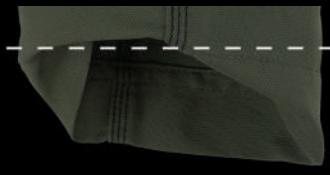

ABRASION RESISTANCE

Abrasion resistance.

ADJUSTABLE

ADJUSTABLE PANTS

Adjustable leg length. Possibility to extend the length of the trousers by evaporating the seam.

KNEE PADS

KNEE PADS

Insert for knee pads. Possibility to use the insert in the area of the knees for their protection.

REFLEX

REFLEX

The product is equipped with a reflective element that ensures visibility in the dark and dark.

BENNON

Certificate

COMFORTABLE FOOTWEAR

Healthy footwear and quality guarantee

The Comfort Shoes brand has been a part of the Czech quality project since 2016. In order for footwear manufactured to receive this award, the trademark must meet several strict criteria. Protective mark guarantees to consumers that the product they have bought has correct construction, ensures comfortable wearing without health risk, is highly durable, has a long service life, the correct size designation and meets a number of other quality parameters. This also applies to our shoes from the collections Rebel, Prim, White & Ortho.

LIGHT CORK

feet as in cotton...

Made in Europe. Handmade.

A DISTINCTIVE HEEL BOWL

ensures good stability
and correct position
of the heel bone

UPPER RESPECTING THE NATURAL ANATOMY OF THE HUMAN FOOT

the shoes fit well, it remains
comfortable even when worn for
a long time

MOSS MIDSOLE

absorbs shocks when walking

VERY LIGHT AND FLEXIBLE SOLE EVA (RIBBED DESIGN)

anti-slip SRA properties,
very soft tread when walking

UNIQUE LIGHT NATURAL CORK INSOLE

- sweat desorption absorption,
ie. longer freshness of the feet
- support for transverse and
longitudinal arch
- insulation before cooling
and hot from the ground

3% elastane and 2% polyamide

size range: **39–49**

TREK SOCK SUMMER Black

CODE: 01080000060

Main material: 89% polypropylene, 8% polyamide
and 3% elastane

size range: **39–49**

GELAXA Insole

CODE: 0644000085

The trimming gel insole is specially designed to activate the longitudinal arch of the foot and at the same time effectively dampen shocks in the heel.

Main material: PU + TPE gel + textile MESH

size range:
36-40, 41-46

ECORNA Insole

CODE: 0130000080

A very comfortable insole with a sporty design and innovative eCorn technology, which creates a feeling of lightness and a soft tread with the help of individual eCorn components.

Main material: PU + eCORN

size range:
36-48

ACTIVA ESD Insole

CODE: 0129000080

Anatomically shaped insole, which is developed for the support of the transverse and longitudinal arch. In the heel area is soft padding, which is a shock absorber for heel bone. Thanks to active coal absorb odor and suck sweet.

Main material: TPU+Hi-poly with active coal + textile ESD

size range:
36-48

SUPREMA Gel ESD Insole

CODE: 0128000020

Gel anatomically shaped insole with support for longitudinal and transverse arches. The insole is suitable for heavy-duty work use and active leisure. A thick layer of gel filling in the heel area absorbs shocks and has a positive effect on long-term or excessive foot loading.

Main material: EVA + gel TPE + textile ESD + active coal

size range:
36-50

ABSORBA XTR ESD Insole

CODE: 0688000062

Comfortable insole with ESD properties suitable for EPA. Thanks to activated carbon, the insole has an antibacterial effect. The shaped deep heel cup ensures sufficient comfort in step on the heel bone.

Main material: Hi-poly with active coal + textile ESD

size range:
36-50

Upgrade

WARRIOR Insole

CODE: 0142000062

Anatomically shaped three-component insole equipped with a heel shock absorber ensuring soft landing and increasing comfort while wearing.

Main material: non-woven textile Cambrelle + EVA + PU

size range:
36-47

THERMA Wool Insole

CODE: 0633000020

Trimming winter insole with 30% sheep wool. Sheep wool is known for good warmth and ability to absorb up to 80% humidity. In this way, the insole provides not only warm comfort but also the feeling of dry feet. The underside of the insole is made of aluminum foil, which provides excellent thermal insulation properties.

Main material: 30% wool, polyethylen foam, aluminium foil

size range: **36–46**

D-SOLE Insole

CODE: 0145000060

Traditional anatomically shaped insole made from non-woven textile and Cambrella fabric on the surface, with excellent absorption and desorption of moisture. The insole contains antistatic stitching.

Main material: non-wowen textile, Cambrella non-woven textile

size range: **35–50**

THERMA Insole

CODE: 0632000010

Trimming insole with fleece felt upper material. The backside of the insole is from aluminum foil, which provides very good thermoregulation and protects feet from the cold. The insole is suitable for cold weather; provides warm comfort inside shoes. Adjust the required size of the insole with scissors according to the marked sizes.

Main material: fleece felt, aluminum foil, polyethylene foam

size range: **36–46**

COMFORTA Insole

CODE: 0141000010

A special hygienic polyethylene insole with massaging effects. The insole is easily removable and washable.

Main material: 100 % polyethylene

size range: **36–49**

Yeti Crampon

CODE: 0154000060

To be used by workers, sportsmen, tourists, children and seniors. It is produced from rubber material of high quality. It is strongly fixed with shoe. Resistant to frost and other weather conditions. Sophisticated construction of metal spikes.

size range:

M 36-39, L 40-44, XL 45-48

SAFE GUEST GRIP

CODE: 0104000060

Rubber safety cover with a protective toe cap and a slip resistant sole to be put on the shoes of visitors in dangerous working areas. The product provides enough space, is easy to put on and holds tight on the shoe.

size range:

M 36-42, XL 43-50

standard:

EN ISO 22568-1:2019,
EN ISO 20344:2011 SRA

READY FOR
TOMORROW
