tested to work

MASCOT® SAFE | EN

MASCOT® SAFE

A comprehensive assortment of safety workwear

MASCOT has the broadest range of safety clothing in the industry. To make it easier for you, we have divided the assortment into ranges, each with their own specific characteristics. Choose between three fluorescent colours and a huge array of products; from head to toe and from inner to outer.

Visible and safe with EN ISO 20471

EN ISO 20471 is an international standard that sets requirements for safety workwear for employees in high-risk areas. The standard is divided into three classes, according to the risk zone in which one works, and to how well the product is able to protect the employee.

Carefully choose the safety class

It is the requirement for visibility - and thus the requirement for the area of reflectors and fluorescent material – that determines which class you should choose. The highest class is class 3. At MASCOT there are two ways to attain class 3: either choose an EN ISO 20471 product that is rated class 3 on its own, e.g., a jacket, or choose two products that, when worn together, are class 3 certified.

Reasons for choosing MASCOT® SAFE

Certified visibility and safety

- Approved according to the international standard EN ISO 20471.
- The fluorescent material keeps you visible during the day and the reflectors keep you visible at night.
- The dirt repellent surface keeps the clothing cleaner and keeps you visible.

Safety workwear for everyone

- For everyone who needs certified safety workwear – functions suited for all professions.
- Trousers with up to three leg lengths and a variety of sizes.
- Three different fluorescent colours, and multiple contrast colours.

The best for your workday

- Innovative fabric qualities with focus on durability, comfort and safety.
- Unique freedom of movement for a workday at a high pace.
- Thoroughly tested pockets and details.

Combine products and achieve the highest protection

For you and your colleagues there are two ways to attain the highest safety class according to EN ISO 20471: either choose an EN ISO 20471 product that is rated class 3 on its own, or choose two products that together are class 3 certified. MASCOT has had approved a unique and simple letter system that makes it easier to understand the various classes and provides an overview of the different combination options for attaining class 3 clothing. The system is approved by the certification institute and eliminates uncertainty. In this way, employees always have the correct safety class.

Assembly-certification

At MASCOT you can combine two individual products with EN ISO 20471 certification and attain class 3 for the assembled set.

Tops with reflective strips on sleeves

Vests, and tops without reflective strips on sleeves

A

B

C

Trousers *)

Y

Z

Shorts or 3/4 Length Trousers

X

*) Bib & Braces can be combined into a certified class 2 or 3 as long as the upper body garment is worn over the bib. If the T-shirt or top is worn under the bib, then it is the class of the Bib & Brace alone that determines the total class.

Jacket 19009-511 is certified class 2 (product group A) and 3/4 length trousers with kneepad pockets and holster pockets 19049-711 are certified class 1 (product group X). When combining these two products, you achieve the highest safety, certified class 3. In the same way, you can combine all MASCOT's products to achieve a higher certification class. Next to each picture with safety workwear we have mentioned the certification class of the entire outfit. Look for the symbol.

WORKWEAR

ULTIMATE STRETCH

WORKWEAR

Flexible kneepad pockets with high wear resistance

The kneepad pockets are made from a very durable CORDURA®, which is tested to be seven times stronger than cotton. The kneepads are easily inserted at the bottom, and the height at which they are placed is adjustable.

Elastic stretch fabric which is suitable for industrial washing

The stretch fabric has been developed using the most advanced elastic fibres on the market. This means the product not only has an extraordinary amount of stretch, but also tolerates industrial washing at 60 degrees. The ProWash® label is your guarantee that the product is suitable for industrial washing and drying.

Many spacious pockets

The trousers' spacious pockets also have room for plenty of tools. Tools can be distributed across the front pockets, back pockets, thigh pocket, the Kevlar®-reinforced sliding rule pocket, and front-thigh pockets with flaps. The pocket flaps, which often dirty easily, are dirt-repellent. The thigh pocket comes with a lined telephone pocket, hidden press stud fastening and detachable ID card holder. The concealed hammer loop on the right side is an added detail. The pockets are fully integrated in the design. And thanks to the stretch fabric, you can fill the pockets without losing freedom of movement.

Stretch material that follows all body movements

The stretch material is flexible in all directions providing a unique freedom of movement with nothing that tightens or bothers. The water-repellent multifunctional stretch material combines low weight with very high durability. The flexible material feels soft and comfortable - almost like a second skin.

Certified visibility and safety

Approved according to the international norm EN ISO 20471 that imposes requirements on visible workwear for employees in high-risk areas. The fluorescent material keeps you visible in daylight and the reflectors with the highest reflectivity make you visible in the dark.

MASCOT® ACCELERATE SAFE | Trousers with thigh pockets, four-way stretch

Product number: **19379-510**

83% recycled polyester/17% elastolefin - 205 g/m²

Hi-Vis Group Z. Certified to EN ISO 20471 - class 1. The product is certified with maximum 0,0200 m² (76 cm) - 0,0500 m² (82+90 cm) logo area. This approved area must not be exceeded. Logo on, respectively, front or back of the product can constitute only a maximum of 50% of the total approved logo area in order to maintain the EN ISO 20471-certification.

Leg length and size: 76 cm: C 46-C 58 • 82 cm: C 44-C 68 • 90 cm: C 46-C 62

- Four way stretch material provides unique freedom of movement and comfort.
- The water-repellent multifunctional stretch material combines a low weight with a very high durability.
- Low waist with form-cut waistband ensures comfort and freedom of movement.
- Ergonomically shaped trouser legs are constructed to follow the body's natural movements.
- CORDURA® (1000 D) reinforcements on knee.
- As standard in three different leg lengths, so you can choose the best fit and optimal placement of details just for you.
- The product tolerates industrial washing.

Oeko-Tex® Standard 100

The Oeko-Tex® label is your guarantee that products have been checked for the content of hazardous substances. The Oeko-Tex® Standard 100 is an internationally recognised labelling system and the world's leading health label for textile products. The Oeko-Tex® label means that the products have been tested and approved for the content of hazardous or potentially hazardous chemicals and colourants.

This Oeko-Tex® label places strict demands on products – stricter even than those set by legislation. The label is awarded only after the product has been thoroughly tested and approved by an impartial party. Testing is carried out on all materials included in the product, which means not only the textiles but also any printed labels and accessories such as zips.

- Co-certified for use with MASCOT kneepad type SHORT or LONG, as the kneepad pocket is height-adjustable.

Individual adjustment

The combi suit has many features, and is therefore easy to adjust to suit personal preference. The shoulder straps are adjustable to ensure both a great fit and that the pockets on the top and legs sit where they should. The outer leg has a detachable button for attaching a knife holder, and the thigh pocket has an integrated and detachable ID-card holder.

Many spacious pockets

The combi suit's many spacious pockets have room for plenty of tools. Distribute your tools across the Kevlar® and CORDURA®-reinforced detachable holster pockets, front pockets, back pockets, thigh pocket, front-thigh pockets with flaps, ruler pocket and breast pocket. In addition, the vertical zip on the back thigh allows for ventilation to the legs and back.

Flexible kneepad pockets with high wear resistance

The kneepad pockets are adjustable and made from a special two-way CORDURA® stretch fabric, which is proven to be seven times stronger than cotton. The kneepads are inserted from the bottom.

High level of comfort and wear resistance

The stretch fabric is elastic in all directions, which provides unique freedom of movement where nothing restricts or irritates. The multifunctional fabric combines a low weight with a very high wear resistance, while also being water-repellent. Thanks to the soft back and the flexible fabric, you will barely notice the combi suit against your skin.

Certified visibility and safety

Approved according to the international norm EN ISO 20471 that imposes requirements on visible workwear for employees in high-risk areas. The fluorescent material keeps you visible in daylight and the reflectors with the highest reflectivity make you visible in the dark.

- Detachable holster pockets.
- Ruler pocket with Kevlar® reinforcement - particularly resistant to pointed and sharp objects.

CORDURA® fabric for everyday wear and tear

High durability is crucial when you are working at a fast pace. Holster pockets and ruler pockets have to stand the pressure when tools, nails and screws are taken in and out of the pockets countless times throughout the day. MASCOT ensures durability by using lots of CORDURA® fabric on all the exposed places, such as kneepad pockets, holster pockets and ruler pockets. CORDURA® fabric is in fact seven times stronger than cotton. We use both 1000D CORDURA® and the lighter 500D CORDURA®.

PREMIUM

MASCOT® ACCELERATE SAFE | Hoodie with zipper, modern fit

Product number: **19284-781**

50% polyester/50% cotton - 260 g/m²

Hi-Vis Group A. Certified to EN ISO 20471 - class 3 (XS-S = class 2). Certified to EN 13758-2 UPF 40+. The product is certified with maximum 0,2400 m² (XS-S) - 0,0300 m² (M-5XL) logo area. This approved area must not be exceeded. Logo on, respectively, front or back of the product can constitute only a maximum of 50% of the total approved logo area in order to maintain the EN ISO 20471-certification.

Size: XS-5XL

- Fabric with polyester on one side for both wear resistance and colour fastness and cotton on the other side, for the sake of comfort.
- Modern, close fit with great freedom of movement.
- Extra freedom of movement with elastic reflectors.
- Front pockets with zippers for safe storage.
- Extra padding over the seam at the neck so the seam does not cause irritation.

ProWash®

MASCOT® ACCELERATE SAFE | Trousers with kneepad pockets, stretch inserts

Product number: **19679-236**

70% polyester/30% cotton - 215 g/m²

Hi-Vis Group Z. Certified to EN ISO 20471 - class 1. The product is certified with maximum 0,0300 m² (76 cm) - 0,0500 m² (82+90 cm) logo area. This approved area must not be exceeded. Logo on, respectively, front or back of the product can constitute only a maximum of 50% of the total approved logo area in order to maintain the EN ISO 20471-certification.

Leg length and size: 76 cm: C 46-C 58 • 82 cm: C 44-C 68 • 90 cm: C 46-C 62

- Light and strong fabric with ripstop. Ripstop is a super durable weave that helps fabric to last for a very long time.
- The product is a combination of regular fabric and stretch fabric, with the stretch fabric placed where extra freedom of movement is required.
- Low waist with form-cut waistband ensures comfort and freedom of movement.
- Ergonomically shaped trouser legs are constructed to follow the body's natural movements.
- The kneepad pockets of durable CORDURA® are adjustable so the kneepads have the optimal position on your knees.
- As standard in three different leg lengths, so you can choose the best fit and optimal placement of details just for you.
- Prepared for holster pockets 19450-126, which are attached with buttons.
- Co-certified for use with MASCOT kneepad type SHORT or LONG, as the kneepad pocket is height-adjustable.
- The product tolerates industrial washing.

Fabric 236

Fabric 236 combines a very low weight with stretch zones. Products in this fabric are extremely light, of premium quality and have excellent wear resistance.

- Prepared for holster pockets 19450-126, which are attached with buttons.
- Co-certified for use with MASCOT kneepad type SHORT or LONG, as the kneepad pocket is height-adjustable.
- The product tolerates industrial washing.

Promote your business with your company name and logo

Be aware that there are special requirements for logo print and embroidery on fluorescent safety workwear.

When applying logo print or embroidery on fluorescent workwear with EN ISO 20471, special demands for the size of the logo must be met in order to maintain the safety certification. Safety workwear is certified and classified according to the product's area of fluorescent material. If this area is covered with a larger logo than allowed, the certification will no longer apply.

Naturally, it should be possible for your customers to see which company you represent, so a maximum logo area is specified for each product. Logos on, respectively, the front or back of the product can constitute only a maximum of 50% of the total approved logo area in order to maintain the EN ISO 20471-certification. See the options for logo application under each product.

MASCOT® ACCELERATE SAFE | T-shirt, long-sleeved, modern fit

Product number: **19081-771**

50% polyester/50% cotton - 150 g/m²

Hi-Vis Group A. Certified to EN ISO 20471 - class 3 (S = class 2). Certified to EN 13758-2 UPF 40+. The product is certified with maximum 0,2300 m² (S) - 0,0000 m² (M-5XL) logo area. This approved area must not be exceeded. Logo on, respectively, front or back of the product can constitute only a maximum of 50% of the total approved logo area in order to maintain the EN ISO 20471-certification.

Size: S-5XL

- Fabric with polyester on one side for both wear resistance and colour fastness and cotton on the other side, for the sake of comfort.
- Modern, close fit with great freedom of movement.
- Extra freedom of movement with elastic reflectors.
- Extra padding over the seam at the neck so the seam does not cause irritation.

Pockets for all your tools

The boilersuit has pockets for all your tools: Breast pocket with zip, front pockets, reinforced back pockets, adjustable hammer loop, reinforced sliding rule pocket, pockets with flaps on the front thigh and a thigh pocket with telephone pocket and flap with concealed press stud fastenings. The pocket flaps on the front thigh are dirt-repellent, keeping an area that easily gets dirty nice and presentable for longer.

Light fabric that tolerates industrial washing

The boilersuit offers superior comfort thanks to details such as the elastic areas placed just where you need that extra suppleness during an active working day. Even though the fabric is lightweight, features such as double-stitched seams on the legs and crotch ensure optimum wear resistance. Furthermore, the combination of fabric 236 and four-way stretch fabric 511 mean that the boilersuit has been tested to retain its shape, colour and functionality, even after multiple industrial washes.

Flexible kneepad pockets with high wear resistance

Remember to choose effective protective kneepads. In this boilersuit, the kneepads are inserted from the bottom, preventing the kneepad pocket from collecting sand and dirt. The kneepad pockets are adjustable so that the kneepads can be placed where your knees need the extra protection. The kneepad pockets are made from the durable CORDURA® fibre.

Excellent freedom of movement

The boilersuit has an excellent fit with elastic at the back and stretch zones in fabric 511, allowing for extra freedom of movement. The front fastening with a two-way zip adds flexibility, while the sleeves are adjustable and feature press studs on the wrist.

Certified visibility and safety

Approved according to the international norm EN ISO 20471 that imposes requirements on visible workwear for employees in high-risk areas. The fluorescent material keeps you visible in daylight and the reflectors with the highest reflectivity make you visible in the dark.

- Fastening with waterproof zip and internal storm flap.
- Front pockets with waterproof zips.
- Adjustable elastic drawstring at waist.

Innovative lining

The lining on this parka bears a CLIMASCOT® Lightweight Insulation label. As well as having particularly high insulating properties, CLIMASCOT® is also breathable and lightweight and therefore takes up very little space when compressed. CLIMASCOT® is also an eco-friendly choice as it is made from recycled materials.

All the pockets you need

With this parka, you can rest assured that all your pocket contents are safely tucked away. Both the front pockets and the breast pocket come with a waterproof zip. Inside, the parka has another three pockets; two zipped pockets and one open mesh pocket. An added detail is the detachable ID-card holder and an extra piece of fabric at the bottom on the back, which folds away via buttons. The fabric adds extra length at the back to protect against the elements.

Individual hood adjustment

Avoid wind and rain on your head and neck with this lined wind and waterproof hood. Adjust it using the concealed elastic cord with cord stop. When not in use, the hood can be easily removed using the hook and loop fastening and press studs.

Visible and safe

This parka is approved in accordance with the international standard EN ISO 20471, which sets requirements for high-vis workwear for employees in high-risk areas. The fluorescent fabric keeps you visible in daylight, while the reflectors keep you visible in the dark thanks to their supreme reflectiveness. The parka is certified as class three, which is the highest certification class attainable.

Certified weather protection

The parka is breathable, wind and waterproof, and approved in accordance with both the EN 343 standard for protection against rain and the EN 342 standard for protection against cold. The front zip is waterproof and has an internal storm cuff. Thanks to the garment's ergonomic cut and elastic fabric, this parka is extremely comfortable to wear and offers full freedom of movement.

Fabric 449

Fabric 449 is a lightweight wind and waterproof fabric with a slight stretch. The products in this fabric quality are flexible and give users a high level of comfort.

MASCOT® ACCELERATE SAFE | Parka with CLIMASCOT®-lining, lightweight

Product number: **19030-449**

100% polyester - 210 g/m²

Hi-Vis Group A. Certified to EN ISO 20471 - class 3, EN 343 - class 4/1/X and EN 342:2017- kl. 3/WP (2,258 clo). The product is certified with maximum 0,2100 m² (S-5XL) logo area. This approved area must not be exceeded. Logo on, respectively, front or back of the product can constitute only a maximum of 50% of the total approved logo area in order to maintain the EN ISO 20471-certification.

Size: XS-5XL

- Breathable, wind and waterproof with taped seams.
- Unique CLIMASCOT® insulation provides warmth without bulk. Lightweight, soft CLIMASCOT® insulation takes up almost no space when compressed.
- Fastening with waterproof zip and internal storm flap.
- Chest pocket with waterproof zip.
- Front pockets with waterproof zips.
- Flap on back of jacket can be folded up for standard back length or released for extended back.

More about fabric 449

The fabric's elasticity is combined with a very low weight. The result is a flexible product that gives users optimum freedom of movement. Fabric 449 also protects against extreme weather and is tested to withstand water resistancy of 10,000 mm. Together, the fabric and membrane provide a high level of breathability to help eliminate body heat, keeping you warm and dry all day long.

- Co-certified for use with MASCOT kneepad type SHORT or LONG, as the kneepad pocket is height-adjustable.

EN 343

EN 342

Protection against cold and rain

When cold and rain are really a challenge, you must be able to trust that your workwear will protect you. You can do so by choosing winter workwear with EN 342, protection against cold and EN 343, protection against rain.

EN343

Y
Y
X

EN 343:2019

Products that are certified in accordance with EN 343:2019 are tested for their level of waterproofness and breathability in the product as a whole. This certification is expressed in three different figures which respectively indicates the product's waterproofness, breathability and whether the finished product has been tested in a downpour. The first two figures indicate a class between 1–4, where four is the highest. The last figure is either an R or an X, where R indicates that the product has been tested.

EN342

X
WP

EN 342

Each product with EN 342:2017 certification is individually certified in accordance with different classes. These classes describe the thermal insulation value, air permeability and, if applicable, the waterproofness of the product. The letter Y on the side of an EN 342:2017 pictogram indicates the thermal insulation value. On MASCOT products, this information won't be presented beside the symbol. Instead, it is generally stated above the product information section.

EN ISO 20471

Many spacious pockets

The trousers' spacious pockets make room for many tools. Divide your tools in front pockets, back pockets, thigh pocket, ruler pocket and pen pocket. The thigh pocket has both an internal and external phone pocket, and they are reinforced to easily withstand the challenges of your workday. Additional details include an adjustable hammer loop and a place within the front pocket to easily insert a laundry chip.

Flexible kneepad pockets with high durability

The kneepad pockets are adjustable and made from durable CORDURA® that is in fact seven times stronger than cotton. The kneepad pockets are inserted from above and the pockets are closed with flap, so they don't collect dirt. Remember protective kneepads.

Choose the correct leg length

The trousers come in three leg lengths. Each standard leg length can be lengthened by 3 cm by releasing the internal red stitches on the inside of the trousers. The shortest leg length can also be shortened by an additional 3 cm without losing the EN ISO 20471 certification. As a result, you get trousers in leg lengths from 73 cm to 93 cm, and everyone can get trousers with a perfect fit and where the kneepad pockets are placed where they should be according to the user's height.

Certified visibility and safety

Approved according to the international norm EN ISO 20471 that imposes requirements on visible workwear for employees in high-risk areas. The fluorescent material keeps you visible in daylight and the reflectors with the highest reflectivity make you visible in the dark. The material has a Teflon® finish that makes the product dirt repellent and keeps the clothing cleaner, thus maintaining high visibility.

MASCO® Corby | Hoodie, waffled texture, modern fit

Product number: **50138-932**

50% cotton/50% polyester - 310 g/m²

Hi-Vis Group A. Certified to EN ISO 20471 - class 3 (S = class 2). Certified to EN 13758-2 UPF 40+. The product is certified with maximum 0,0600 m² (M-4XL) 0,1900 m² (S) logo area. This approved area must not be exceeded. Logo on, respectively, front or back of the product can constitute only a maximum of 50% of the total approved logo area in order to maintain the EN ISO 20471-certification.

Size: S-4XL

- Modern, close fit with great freedom of movement.
- Fabric with polyester on one side for both wear resistance and colour fastness and cotton on the other side, for the sake of comfort.
- Heavy-duty zip-pulls on all zippers that are easy to grab, even when wearing gloves.
- Ribbed waist and cuffs.
- Front zipper hidden behind fabric prevents ingress of dirt and dust.
- Extra freedom of movement with elastic reflectors.

Cotton on the inside

A special detail with these products is that the fabric is woven so that the polyester is primarily on the outside, for both wear resistance and colour fastness, and the cotton is on the inside, for comfort. Cotton is soft, moisture absorbing and comfortable against the skin.

Promote your business with your company name and logo

Be aware that there are special requirements for logo print and embroidery on fluorescent safety workwear.

When applying logo print or embroidery on fluorescent workwear with EN ISO 20471, special demands for the size of the logo must be met in order to maintain the safety certification. Safety workwear is certified and classified according to the product's area of fluorescent material. If this area is covered with a larger logo than allowed, the certification will no longer apply.

Naturally, it should be possible for your customers to see which company you represent, so a maximum logo area is specified for each product. Logos on, respectively, the front or back of the product can constitute only a maximum of 50% of the total approved logo area in order to maintain the EN ISO 20471-certification. See the options for logo application under each product.

EN ISO 20471

Long-lasting visibility with Teflon®

MASCOT takes your safety seriously and that is why we go even further to ensure your high visibility workwear stays more visible for longer. MASCOT uses Teflon® fabric protector on its high visibility clothing to keep it looking newer for longer (not winterwear). Teflon® fabric protector repels most water and oil-based liquids. You will never know it is there until you need it! Teflon® fabric protector bonds to each fibre to resist stains without affecting the fabrics look or feel. The more dirt repelling your garment is, the more visible it will be.

- Extra visibility with the help of vertical and oblique, transverse reflective strips.
- Inner pocket.
- Edged with band.

Certified visibility makes a difference

Certified safety workwear keeps you visible for colleagues that operate cranes and other motorised vehicles in your vicinity and for work that takes place close to traffic. When the workwear keeps you visible and safe, you can concentrate on work. Class 3 certified workwear ensures maximum visibility.

MASCOT® Oxford | Jacket, high durability, class 2

Product number: **15509-860**

65% polyester/35% cotton - 290 g/m²

Hi-Vis Group A. Tested in accordance with EN ISO 15797. Certified to EN ISO 20471 - class 2. The product is certified with maximum 0,2000 m² logo area. This approved area must not be exceeded. Size: S-4XL

- Teflon® finish makes the product dirt resistant and ensures high visibility.
- No seams on the top of the shoulders: prevents water from penetrating.
- The dark contrast is placed where the clothing is most exposed to dirt.
- Space for easy retrofitting of a laundry chip.
- Additional reflectors located on the back provide extra visibility.
- The product tolerates industrial washing.

When your workwear has to last

Workwear with extra details that increase durability is a good investment in the long run. Choose products with durable CORDURA® or/and dirt-repellent Teflon®. Both extend the total lifespan of the products.

Long-lasting visibility with Teflon®

Teflon® is used in many of MASCOT's fluorescent products. Teflon® is a protecting treatment that penetrates into the fibres and repels most water and oil based liquids. Fluorescent workwear that is dirt repellent is more visible in the surroundings. Since your visibility is crucial for safety at work, Teflon® is a great invention for those who work in or near traffic or machinery. Teflon® is used on quality 860, 470 and 135.

CORDURA® F A B R I C

CORDURA® fabric for everyday wear and tear

High durability is crucial when you are working at a fast pace. Holster pockets and ruler pockets have to stand the pressure when tools, nails and screws are taken in and out of the pockets countless times throughout the day. MASCOT ensures durability by using lots of CORDURA® fabric on all the exposed places, such as kneepad pockets, holster pockets and ruler pockets. CORDURA® fabric is in fact seven times stronger than cotton. We use both 1000D CORDURA® and the lighter 500D CORDURA®.

EN ISO 20471

Certified winter workwear

When cold and rain are really a challenge, you must be able to trust that your workwear will protect you. You can do so by choosing winter workwear with EN 342, protection against cold and EN 343, protection against rain.

EN 343

EN 343

EN 343 is the European standard for protective clothing and describes protection against rain. EN 343 certified workwear is tested to withstand great hydrostatic pressure and for its ability to conduct sweat away from the body. In the description two references are indicated. The first number indicates the water tightness and the second number refers to the breathability of the overall product. Both scale values run from 1-3, where 3 indicates the highest class.

EN 342

EN 342

The best way to protect yourself from the cold is to use workwear that is certified in accordance with EN 342:2017. In order to obtain maximum protection, your workwear should be kept dry and tight around openings, such as the wrists, for example. You will also need to wear gloves and a hat, etc, in order to avoid local cooling. Each individual product is classified in accordance with different values: thermal insulation value (Y), degree of air permeability (AP) and, if applicable, waterproofness (WP).

EN ISO 20471

CORDURA
F A B R I C

MASCOT® Blackpool | Softshell Jacket with fleece on inner side, water-repellent, class 3

Product number: **15502-246**

100% polyester - 360 g/m²

Hi-Vis Group A. Certified to EN ISO 20471 - class 3 (S-M = class 2). The product is certified with maximum 0,0100 m² (L-4XL) 0,2000 m² (S-M) logo area. This approved area must not be exceeded. Logo on, respectively, front or back of the product can constitute only a maximum of 50% of the total approved logo area in order to maintain the EN ISO 20471-certification.

Size: S-4XL

- No seams on the top of the shoulders: prevents water from penetrating.
- Breathable, windproof and water-repellent.
- Durable CORDURA® - reinforcement at the wrist to extend product life.
- The dark contrast is placed where the clothing is most exposed to dirt.
- Extended sleeve on the back of the hand is additional protection against cold and snow.

14

17

CORDURA
F A B R I C

MASCOT® SAFE SUPREME | Softshell Jacket, breathable, windproof and water-repellent

Product number: **20502-246**

100% polyester - 360 g/m²

Certified to RIS-3279-TOM, ONLY colour 14 and EN ISO 20471 - class 3.

Size: S-4XL

- Breathable, windproof and water-repellent.
- Fastening with zip and internal storm flap, so the wind is kept out.
- Inner phone pocket with zipper and a small opening for cord of a headset.
- Durable CORDURA® - reinforcement at the wrist to extend product life.
- Extra protection against the cold with an extended back.

Individual adjustment of the hood

Avoid wind and rain on your head and neck with the lined, windproof and water-repellent hood. The hood is adjustable with hidden elastic drawstrings, and if you don't need the hood, it has press studs for easy removal.

Sleeves with extra functions

You move your arms a lot during a workday so complete freedom of movement is important. With these ergonomically designed sleeves you get this freedom. Weather protection and wear resistance are also included at the cuffs. The extended sleeve on the back of the hand and close-fitting rib inside are additional protection against cold and snow. A durable CORDURA® reinforcement at the wrist, where it is most exposed to wear, helps extend product life.

All the pockets you need

With this jacket you can be sure that the contents of your pockets is safely stored. Both front pockets and chest pockets are with zippers. Inside the jacket you will find two more pockets; one zipped inner pocket is designed especially for a mobile phone with holes for headset wire and guide loops to keep the wire accessible. In addition you will find a pen pocket at the shoulder and a D-ring at the chest for keys or ID-card.

Certified visibility and safety

Approved according to the international norm EN ISO 20471 that imposes requirements on visible workwear for employees in high-risk areas. The fluorescent material keeps you visible in daylight and the reflectors with the highest reflectivity make you visible in the dark. The jacket is class 3 certified, the highest certification class you can achieve. Sizes S-M are, however, class 2.

Breathable, windproof and water-repellent

The outer material is a water-repellent and windproof softshell with an extended back that gives you extra protection. The material is slightly flexible and the jacket is ergonomically designed, so you are ensured great freedom of movement. The jacket is also breathable so you easily can get rid of moisture.

1

STAY DRY

**MOISTURE
WICKING**

2

KEEP WARM

INSULATING

3

**WEATHER
PROTECTION**

**WIND AND WATER
PROTECTION**

1

STAY DRY

**MOISTURE
WICKING**

LAYER 1 — Stay dry

The clothes that you wear closest to the skin must have a strong ability to absorb moisture, transfer it away from the body and distribute it to a larger area to allow the moisture to evaporate quickly.

2

KEEP WARM

INSULATING

LAYER 2 — Keep warm

The middle layer should be insulating and breathable. If it is extra cold, you can clothe yourself with several thin insulating layers.

3

**WEATHER
PROTECTION**

**WIND AND WATER
PROTECTION**

LAYER 3 — Protect against the weather

The outer layer should be breathable to allow moisture from the body to escape. In addition, it should be windproof and waterproof/water-repellent.

Dress in layers

Keeping warm does not necessarily mean dressing in the heaviest jacket you can find. It is about choosing the right clothes from inner to outer.

- Inner phone pocket with zipper and a small opening for cord of a headset.

We produce the clothing

MASCOT's workwear is manufactured at MASCOT's own factories in Vietnam and Laos, where we have more than 2400 MASCOT employees. The vast majority of our workwear is produced by us, which gives us great flexibility to cope with ever-changing demand. But, even more important: It allows for 100% quality assurance, not only with regard to your MASCOT products, but also in terms of the employees' working environment and conditions.

EN ISO 20471

Combine products and attain the highest protection

MASCOT's entire assortment of safety workwear with EN ISO 20471 certification can be combined. A simple letter system makes it easy to see which products you can combine to attain, for example, certified class 3 clothing. The system is approved by the certification institute and eliminates uncertainty. In this way, employees always have the right safety class.

Assembly-certification

At MASCOT you can combine two individual products with EN ISO 20471 certification and attain class 3 for the assembled set.

Trousers with holster pockets, 17531-860, see page 112

Carefully choose the safety class

It is the requirement for visibility - and thus the requirement for the area of reflectors and fluorescent material – that determines which class you should choose. The highest class is class 3. At MASCOT there are two ways to attain class 3: either choose an EN ISO 20471 product that is rated class 3 on its own, e.g., a jacket, or choose two products that, when worn together, are class 3 certified.

14

17

EN ISO 20471

MASCOT® Mildura | Fleece Jacket with high collar, class 3

Product number: **15903-270**

100% polyester - 250 g/m²

Hi-Vis Group A. Certified to RIS-3279-TOM, ONLY colour 14 and EN ISO 20471 - class 3. The product is certified with maximum 0,1800 m² logo area. This approved area must not be exceeded. Logo on, respectively, front or back of the product can constitute only a maximum of 50% of the total approved logo area in order to maintain the EN ISO 20471-certification.

Size: S-4XL

- Front zipper hidden behind fabric prevents ingress of dirt and dust.
- Chest pocket with vertical zip and easy access - suitable for mobile phone.

- Polyester kneepad pockets with insertion of kneepads from the bottom to avoid dirt collection.
- The kneepad pocket fabric is coated on the inside, which makes them water repellent.
- Durable triple stitched seams on leg and crotch extend product life.
- Trouser legs designed especially so that the fabric at the back does not bunch up when kneeling.
- The product tolerates industrial washing.
- Co-certified for use with MASCOB kneepad type SHORT or LONG, as the kneepad pocket is height-adjustable.

Suitable for hot surroundings

The trousers in fabric quality 236 are also comfortable to wear when it gets warmer, as the fabric quality is light and durable with ripstop which ensures a good comfort.

- The product tolerates industrial washing.

MASCOT® SAFE YOUNG

This line of fluorescent red workwear with dark anthracite contrasts is compliant to the highest safety requirements. Top-class design with slightly angled reflectors and a perfect fit in which you will immediately feel at home.

Great freedom of movement

You will enjoy moving around in this winter boilersuit, as the ergonomic design ensures you great freedom of movement. The hood is detachable, lined and with adjustable elastic drawstring.

Many pockets

The winter boilersuit has numerous pockets, just like your workwear. There are chest pockets, one with magnetic fastening, front pockets, a pen holder, inner pocket, sleeve pocket, back pockets, thigh pocket and a ruler pocket. Under the storm flap you will also find zipped pockets that can be accessed without having to open the boilersuit.

Windproof, waterproof and breathable

The winter boilersuit is breathable, wind and waterproof and certified according to EN 343, protection against rain, and EN 342, protection against cold. The outer material is durable MASCOTEX®, and on the inside, you get an insulating pile lining in body and a lining of quilt in legs and sleeves.

Certified visibility and safety

Approved according to the international norm EN ISO 20471 that imposes requirements on visible workwear for employees in high-risk areas. The fluorescent material keeps you visible in daylight and the reflectors with the highest reflectivity make you visible in the dark.

Practical protection against cold

Extra long zip with storm flap on the outer side of the lower legs so the suit can easily be pulled over boots. At the sleeves, you have a close fitting rib (hidden in the storm flap) that effectively protects against cold. The sleeves can be adjusted with press studs at the cuffs.

Functional, safe winter boilersuit

MASCOTEX® Camina | Pilot Jacket with quilted lining, waterproof MASCOTEX®, class 2

Product number: **09035-025**

100% polyester - 300 g/m²

Hi-Vis Group A. Certified to EN ISO 20471 - class 2 and EN 343 - class 3/1. The product is certified with maximum 0,1900 m² logo area. This approved area must not be exceeded. Logo on, respectively, front or back of the product can constitute only a maximum of 50% of the total approved logo area in order to maintain the EN ISO 20471-certification.

Size: S-4XL

- Breathable, wind and waterproof with taped seams.
- Lined hood with a unique design that means the hood fits closely to the head and follows all movements.
- Quilted lining.
- Protected zipped pocket under storm flap makes it easy to access contents without opening the jacket.
- Form cut sleeves with great freedom of movement.

Protection against cold and rain

When cold and rain are really a challenge, you must be able to trust that your workwear will protect you. You can do so by choosing winter workwear with EN 342, protection against cold and EN 343, protection against rain.

EN 343

EN 343

EN 343 certified workwear is tested to withstand great hydrostatic pressure and for its ability to conduct sweat away from the body. In the description of the certification, two references are indicated. The first number indicates the water tightness and the second number refers to the breathability of the overall product. Both scale values run from 1-3, where 3 indicates the highest class.

EN 342

EN 342

Each product with EN 342:2017 certification is individually certified in accordance with different classes. These classes describe the thermal insulation value, air permeability and, if applicable, the waterproofness of the product. The letter Y on the side of an EN 342:2017 pictogram indicates the thermal insulation value. On MASCOT products, this information won't be presented beside the symbol. Instead, it is generally stated above the product information section.

Attain class 3 with a class 2 certified softshell jacket

MASCOT® Antas is a popular softshell jacket in the fluorescent assortment. The softshell jacket is breathable, windproof and water-repellent, and, by combining the softshell jacket with a pair of EN ISO 20471 certified trousers, you can upgrade your workwear to class 3.

- Co-certified for use with MASCOT kneepad type, LONG.

EN ISO 20471

Individual adjustment

Adjustable straps to make the bib & brace fit you. The strong elastic straps increases your freedom of movement and support also when bent forward. At the waist the bib & brace can be adjusted to different widths.

Functional and safe bib & brace

The bib's spacious pockets give you plenty of room for tools. Divide your tools in front pockets, back pockets, thigh pockets, ruler pocket and pen pocket. You also have a lot of room for storage in the bib pocket with flap and press studs, and an inner pocket with hook and loop band fastening.

Remember the kneepads

Remember to buy kneepads that fit your profession. In these bib & braces the kneepads are inserted from the bottom. An advantage as the kneepad pocket will avoid collecting dirt.

High comfort and wear resistance

Fabric qualities 860 and 470 are designed with the polyester primarily on the outside for both wear resistance and colour fastness and cotton on the inside, for the sake of comfort. Cotton is soft, moisture absorbing and comfortable against the skin. The inside of the legs have triple stitched seams that extend product life.

Certified safe and secure

Certified according to the international standard EN ISO 20471. The fabric has a Teflon® finish that makes the product dirt resistant and ensures high visibility. The fluorescent areas are also not exposed to as much dirt, as the dark contrast colour is placed where the product is most exposed to dirt. Bib & braces can be combined to a certified class 2 or 3 as long as the upper body garment is worn over the bib. If the T-shirt or top is worn under the bib, then it is the class of the bib & brace alone that determines the total class.

MASCOTEX®

MASCOTEX® Teresina | Winter Jacket with pile lining, waterproof, class 3

Product number: **07223-880**

100% polyester (MASCOTEX®) - 240 g/m²

1

Quilted gilet

MASCOT® Loreto is a multi-functional product that can be changed and fits the situation regardless of wind and weather conditions. MASCOT® Loreto gives you a quilted gilet, outer shell jacket, outer shell gilet, quilted jacket and quilted gilet all in one. The thermal gilet is a part of the lining. It is approved according to EN ISO 20471, class 1.

2

Quilted jacket

The lining is a self-standing quilted jacket with rib collar and pockets. The quilted jacket is certified according to EN ISO 20471, class 3.

5

Winter jacket

The product is certified according to the international standard EN ISO 20471, class 3. The jacket is breathable, windproof and water-repellent. The winter jacket's outer material is MASCOTEX® and it meets the demands of EN 343, class 3/3 – European standard for protection against rain. The hood MASCOT® MacCall is made from the same material and can be bought separately and attached with press studs.

3

Outer shell jacket

When the lining is removed, you have a thin and flexible outer shell jacket that is breathable, windproof and water-repellent. The back is extended to protect against cold. The outer shell jacket is certified according to EN ISO 20471, class 3 and it is possible to adjust both at wrists and lower back.

4

Outer shell gilet

When you remove the sleeves from the outer shell jacket, you will maintain your certified visibility. The outer shell gilet is certified according to EN ISO 20471, class 2. The outer shell gilet has spacious chest pockets and front pockets. The outer shell gilet can be used together with the quilted jacket or with the quilted gilet underneath.

OEKO-TEX®

CONFIDENCE IN TEXTILES

STANDARD 100

5548 Shirley

Tested for harmful substances.
www.oeko-tex.com/standard100

Oeko-Tex® Standard 100

The Oeko-Tex® label is your guarantee that products have been checked for the content of hazardous substances. The Oeko-Tex® Standard 100 is an internationally recognised labelling system and the world's leading health label for textile products. The Oeko-Tex® label means that the products have been tested and approved for the content of hazardous or potentially hazardous chemicals and colourants.

This Oeko-Tex® label places strict demands on products – stricter even than those set by legislation. The label is awarded only after the product has been thoroughly tested and approved by an impartial party. Testing is carried out on all materials included in the product, which means not only the textiles but also any printed labels and accessories such as zips.

MASCOTEX®

MASCOT® Savona | Parka with detachable quilted lining, waterproof MASCOTEX®, class 3

Product number: 00930-880

100% polyester (MASCOTEX®) - 240 g/m²

Hi-Vis Group A. Certified to EN ISO 20471 - class 3 (XS = class 2) and EN 343 - class 3/1. The product is certified with maximum 0,0200 m² (S-4XL) 0,2800 m² (XS) logo area. This approved area must not be exceeded. Logo on, respectively, front or back of the product can constitute only a maximum of 50% of the total approved logo area in order to maintain the EN ISO 20471-certification.

Size: XS-4XL

- Breathable, wind and waterproof MASCOTEX® with taped seams.
- Quilted lining can be zipped out.
- Fastening with two way zip, double storm flap and hidden press studs.
- Protected zipped pocket under storm flap makes it easy to access contents without opening the jacket.
- Press studs to attach a hood if required.

A parka with many possibilities

The insulating quilted lining makes the jacket especially suitable for cold weather. The lining can easily be removed to give you an outer shell jacket that effectively protects you against rain and wind. For extra head and neck protection you can supplement your jacket with a hood in the same material.

Effective fastening

The jacket has fastening with two way zip, so you can open the zip from the bottom if needed. The fastening has effective weather protection with double storm flap and hidden press studs. Under the storm flap you find a zipped pocket that makes it easy to access your phone or other items without having to open the jacket.

Extra protection

The parka is a longer jacket that protects against cold. The width can be adjusted with elastic drawstring at waist so cold and wind are kept out. The parka has spacious chest pockets that are closed with zipper and front pockets with flap and press studs. The parka also has a D-ring for ID-card or keys.

Certified visibility and safety

Approved according to the international norm EN ISO 20471 that imposes requirements on visible workwear for employees in high-risk areas. The fluorescent material keeps you visible in daylight and the reflectors with the highest reflectivity make you visible in the dark.

Breathable, wind and waterproof

The parka is made of the breathable, wind and waterproof MASCOTEX®. Rain is kept out with a laminate on the back of the material and a waterproof tape on all seams. The parka is certified according to EN 343, class 3/1, an European standard for protection against rain.

Choose a top based on your taste and profession

With MASCOT you have access to a very large selection of safety certified T-shirts, sweatshirts, jumpers and jackets. Choose products based on your needs and your taste – tops in different safety classes, for different industries and with different fits.

- Teflon® finish makes the product dirt resistant and ensures high visibility.
- Durable triple stitched seams that extend the product life.
- Access to trousers underneath from both sides.
- Elastic and pleat in the back.
- Adjustable kneepad pockets so kneepads can be optimally placed on the knee.
- Co-certified for use with MASCO kneepad type, LONG.

EN ISO 20471

Pockets for tools

This boilersuit has plenty of pockets for tools: sleeve pocket, chest pockets with flap, pen pocket, front pockets, inner pocket with zipper, reinforced back pockets with flap, adjustable hammer loop, thigh pocket and ruler pocket. You also have access to the contents of your trouser pockets from both sides.

Remember the kneepads

Remember protective kneepads. If you use kneepads from MASCOT, you will meet the safety standard EN 14404. In this boilersuit the kneepads are inserted from the bottom - an advantage as the kneepad pocket won't collect dirt. The kneepad pockets are adjustable.

Certified visibility and safety

Approved according to the international norm EN ISO 20471 that imposes requirements on visible workwear for employees in high-risk areas. The fluorescent material keeps you visible in daylight and the reflectors with the highest reflectivity make you visible in the dark.

Great freedom of movement

The boilersuit has a great fit with elastic and pleats in the back. Ventilation under the sleeves and fastening with two way zip and press studs gives you extra flexibility. Choose between two leg lengths and many sizes as standard.

Dirt repellent surface ensures high visibility

The product is given a dirt repellent Teflon® finish. Teflon® is a protecting treatment that penetrates into the fibres and repels most water and oil based liquids. Fluorescent workwear that is dirt repellent is more visible in the surroundings.

MASCOT® SAFE ARCTIC

Sturdy and warm safety workwear for those who work in low temperatures and who need to be visible at all times. Durable and wear resistant safety workwear with a classic fit.

MASCOTEX®

MASCOT® Tombos | Winter Boilersuit with pile lining, waterproof MASCOTEX®, class 3

Product number: 11119-880

100% polyester (MASCOTEX®) - 240 g/m²

Certified to RIS-3279-TOM, ONLY colour 14 and EN ISO 20471 - class 3, EN 343 - class 3/1 and EN 342:2017 - kl. 3/WP (2,10 clo). The product is certified with maximum 1,3300 m² logo area. This approved area must not be exceeded. Logo on, respectively, front or back of the product can constitute only a maximum of 50% of the total approved logo area in order to maintain the EN ISO 20471-certification.

Leg length and size: 82 cm: S-4XL

- Breathable, wind and waterproof MASCOTEX® with taped seams.
- Detachable lined hood with adjustable elastic drawstring.
- Stretch fabric at the back provides extra freedom of movement.
- Extra long zip with storm flap on outside of lower leg so they can be easily pulled on over boots.

EN ISO 20471

Breathable, wind and waterproof

The winter boilersuit is made of the breathable, wind and waterproof MASCOTEX®. Rain is kept out with a laminate on the back of the fabric and waterproof tape on the back of all seams. The winter boilersuit is certified according to EN 343, class 3/1, the European standard for protection against rain.

Certified visibility and safety

Approved according to the international norm EN ISO 20471 that imposes requirements on visible workwear for employees in high-risk areas. The fluorescent material keeps you visible in daylight and the reflectors with the highest reflectivity make you visible in the dark.

Many pockets

The winter boilersuit has many pockets, just like your workwear. The product has chest pockets, D-ring, front pockets, pen holder, inner pockets, back pockets, thigh pocket and a ruler pocket. Fastening with two way zip and press studs provides extra flexibility.

Very insulating against cold

Protection against cold is best achieved by wearing clothes that are certified according to EN 342. This winter boilersuit is certified according to EN 342 3/WP. Insulating pile lining in the body and lining of quilt in the legs and sleeves, so you easily can move around. The hood is detachable, lined and with adjustable elastic drawstring.

Practical protection against cold

Extra long zip with storm flap on the outer side of the lower legs so the suit can easily be pulled over boots. At the sleeves, you have a close fitting rib (hidden in the storm flap) that effectively protects against cold. The sleeves can be adjusted with press studs at the cuffs.

Durable jackets

Do you need a hood for your jacket?

MASCOT® Quebec has a detachable hood. For the two MASCOT® Innsbruck pilot jackets you can buy a hood in the same fabric as the jacket. MASCOT® Alaska is not suited for a hood.

14

- Ribbed waist and cuffs.
- Press studs to attach a hood if required.

Keep rain out and comfort in with MASCOTEX®

MASCOTEX® is a fabric with a breathable laminate on the back that makes the material waterproof. When MASCOT makes workwear in MASCOTEX®, all seams are taped so your MASCOTEX® product is 100% waterproof. Without taped seams, water can penetrate and the product will be labelled as water-repellent instead.

MASCOT® MacCall

MASCOT® MacKlin

Keep your neck and head warm

The MASCOT® MacCall and MASCOT® MacKlin hoods are designed to be attached to these three products.

- Wind and waterproof.
- Waterproof fabric with welded seams to prevent rain entry.
- Elastic and drawstring waist.
- Press stud adjustment at foot.

EN ISO 20471

Look for the hydrostatic pressure

When buying waterproof workwear, it is important to notice the product's hydrostatic pressure. The hydrostatic pressure test indicates, in millimetres, the fabric's ability to resist water penetration. Clothing to sit, stand and walk in when the rain is pouring down has to have a high hydrostatic pressure rating. In such situations, you should select products with a water resistance of at least 10,000 mm, so you are sure to stay dry all day.

Hydrostatic Pressure Test

The hydrostatic pressure is tested by placing a cylinder of water on a piece of fabric. The water is pressed against the fabric to test how much water pressure the fabric can withstand without water penetrating the fabric.

Find inspiration within MASCOT's comprehensive range

Combine safety workwear with other products from MASCOT's product assortment. We show a selection of accessories on the following pages. You can view MASCOT's entire range, with more than 600 products, online at www.mascotworkwear.com

Multi-use and safety integrated in the details

Do you need a multi-use product with antistatic and flame retardant properties? If so then MASCOT® MULTISAFE is the right choice for you. You also get protection from electric arcs and occasional welding with a product that is extremely soft and comfortable to wear.

010

MASCOT® Oron | Bib & Brace with kneepad pockets, dirt repellent, multi-protective

Product number: **13669-216**

60% modacrylic/39% cotton/1% carbon fibre - 275 g/m²

Certified to EN ISO 11612 (A1, A2, B1, C1, E1, F1), EN ISO 11611 - class 1 (A1, A2), EN 1149-3, EN 1149-5, IEC 61482-2 class 1 (tested in accordance with EN 61482-1-2) / tested in accordance with IEC 61482-1-1 (ATPV - 7,7 cal/cm²) and EN 13034 (Type 6).

Leg length and size: 76 cm: C 46-C 56 • 82 cm: C 42-C 68 • 90 cm: C 46-C 62

- Anti-static, acid-resistant and flame-retardant.
- Dirt repellent.
- Seams face downwards so sparks can not get lodged in them.
- Durable triple stitched seams that extend the product life.
- Adjustable kneepad pockets so kneepads can be optimally placed on the knee.
- Co-certified for use with MASCOT kneepad type, LONG.

O10

MASCOT® Romont | Jacket, dirt repellent, multi-protective

Product number: 13609-216

55% modacrylic/39% cotton/5% polyamid/1% carbon fibre - 275 g/m²

Certified to EN ISO 11612 (A1, A2, B1, C1, E1, F1), EN ISO 11611 - class 1 (A1, A2), EN 1149-3, EN 1149-5, IEC 61482-2 class 1 (tested in accordance with EN 61482-1-2) / tested in accordance with IEC 61482-1-1 (ATPV - 7,7 cal/cm²) and EN 13034 (Type 6).

Size: S-4XL

- Anti-static, acid-resistant and flame-retardant.
- Dirt repellent.
- Protected zipped pocket under storm flap makes it easy to access contents without opening the jacket.
- Form cut sleeves with great freedom of movement.
- Pockets have flap closures to keep sparks out.

O10

MASCOT® Arosa | Trousers with kneepad pockets, dirt repellent, multi-protective

Product number: 13679-216

60% modacrylic/39% cotton/1% carbon fibre - 275 g/m²

Certified to EN ISO 11612 (A1, A2, B1, C1, E1, F1), EN ISO 11611 - class 1 (A1, A2), EN 1149-3, EN 1149-5, IEC 61482-2 class 1 (tested in accordance with EN 61482-1-2) / tested in accordance with IEC 61482-1-1 (ATPV - 7,7 cal/cm²) and EN 13034 (Type 6).

Leg length and size: 76 cm: C 46-C 56 • 82 cm: C 42-C 68 • 90 cm: C 46-C 62

- Anti-static, acid-resistant and flame-retardant.
- Dirt repellent.
- Durable triple stitched seams that extend the product life.
- Ergonomically shaped trouser legs are constructed to follow the body's natural movements.
- Adjustable kneepad pockets with flap and top access, so dirt doesn't collect.
- Co-certified for use with MASCOT kneepad type, LONG.

O10

PREMIUM

MASOCOT® Muri | T-shirt, long-sleeved, multi-protective, modern fit

Product number: **50119-927**

60% modacrylic/39% cotton/1% carbon fibre - 220 g/m²

Certified to EN ISO 11612 (A1, B1, C1, F1), EN 1149-3, EN 1149-5 and tested in accordance with IEC 61482-1-1 (ATPV - 6,4 cal/cm²) and EN 61482-1-2 class 1.

Size: S-4XL

- Great protection with anti-static and flame-retardant properties.
- Modern, close fit with great freedom of movement.
- Long life, with flame retardant thread used in seams.
- Ribbed neck.
- Extra padding over the seam at the neck so the seam does not cause irritation.

O10

PREMIUM

MASOCOT® Horgen | Sweatshirt, multi-protective, modern fit

Product number: **50120-928**

60% modacrylic/39% cotton/1% carbon fibre - 290 g/m²

Certified to EN ISO 11612 (A1, B1, C2, F1), EN 1149-3, EN 1149-5, IEC 61482-2 (tested to EN 61482-1-2 Class 1) and tested in accordance with IEC 61482-1-1 (ATPV 16,5 cal/cm²).

Size: S-4XL

- Great protection with anti-static and flame-retardant properties.
- Modern, close fit with great freedom of movement.
- Long life, with flame retardant thread used in seams.
- Rib at neck, waist and arms.
- Jetted hand pocket under the sleeve for storage, e.g., phone or glasses.
- Extra padding over the seam at the neck so the seam does not cause irritation.

O10

Size: S-3XL

- Modern, close fit with great freedom of movement.
- Great protection with anti-static and flame-retardant properties.
- Long life, with flame retardant thread used in seams.

O10

MASCOT® Zermatt | Functional Under Trousers, multi-protective

Product number: 50122-929

60% modacrylic/39% cotton/1% carbon fibre - 200 g/m²

Certified to EN ISO 11612 (A1, B1, C1, F1), EN 1149-3, EN 1149-5 and tested in accordance with IEC 61482-1-1 (EBT50 5,5 cal/cm²).

Size: S-3XL

- Great protection with anti-static and flame-retardant properties.
- Long life, with flame retardant thread used in seams.
- Elastic at the waist.
- Fly without opening.

Complete safety

The fluorescent workwear is approved according to EN ISO 20471. In addition, more reflective materials have been applied to the products than the standard requires. All fluorescent products are certified to the chemical standard EN 13034, and as one of the few in the industry, MASCOT has jackets certified to Class 2 in the electric arc norm EN 61482-1-2.

17010

MASCOT® Davos | Bib & Brace with kneepad pockets, multi-protective, class 2

Product number: 13869-216

55% modacrylic/39% cotton/5% polyamid/1% carbon fibre - 275 g/m²

Hi-Vis Group Y. Certified to EN ISO 11612 (A1, A2, B1, C1, E1, F1), EN ISO 11611 - class 1 (A1, A2), EN 1149-3, EN 1149-5, IEC 61482-2 class 1 (tested in accordance with EN 61482-1-2), EN 13034 (Type 6) and EN ISO 20471 - class 2.

Leg length and size: 76 cm: C 46-C 56 • 82 cm: C 44-C 68 • 90 cm: C 46-C 62

- Anti-static, acid-resistant and flame-retardant.
- Dirt repellent.
- Double and triple stitched seams on leg and crotch.
- Ergonomically shaped trouser legs are constructed to follow the body's natural movements.
- Adjustable kneepad pockets so kneepads can be optimally placed on the knee.
- Co-certified for use with MASCOT kneepad type, LONG.

17010

MASCOT® Biel | Jacket, multi-protective, class 2

Product number: 13809-216

55% modacrylic/39% cotton/5% polyamid/1% carbon fibre - 275 g/m²

Hi-Vis Group A. Certified to EN ISO 11612 (A1, A2, B1, C1, E1, F1), EN ISO 11611 - class 1 (A1, A2), EN 1149-3, EN 1149-5, IEC 61482-2 class 2 in front and sleeves; back class 1 (tested in accordance with EN 61482-1-2) / tested in accordance with IEC 61482-1-1 (ATPV 7,7 cal/cm²), EN 13034 (Type 6) and EN ISO 20471 - class 2.

Size: S-4XL

- Anti-static, acid-resistant and flame-retardant.
- Dirt repellent.
- Form cut sleeves with great freedom of movement.
- Pockets have flap closures to keep sparks out.
- Extra protection against the cold with an extended back.

17010

MASCOT® Arbon | Trousers with kneepad pockets, multi-protective, class 2

Product number: 13879-216

55% modacrylic/39% cotton/5% polyamid/1% carbon fibre - 275 g/m²

Hi-Vis Group Y. Certified to EN ISO 11612 (A1, A2, B1, C1, E1, F1), EN ISO 11611 - class 1 (A1, A2), EN 1149-3, EN 1149-5, IEC 61482-2 class 1 (tested in accordance with EN 61482-1-2), EN 13034 (Type 6) and EN ISO 20471 - class 2.

Leg length and size: 76 cm: C 46-C 56 • 82 cm: C 44-C 68 • 90 cm: C 46-C 62

- Anti-static, acid-resistant and flame-retardant.
- Double and triple stitched seams on leg and crotch.
- Waist band formed following the body's anatomy so that it supports in all working positions.
- Ergonomically shaped trouser legs are constructed to follow the body's natural movements.
- Adjustable kneepad pockets with flap and top access, so dirt doesn't collect.
- Co-certified for use with MASCOT kneepad type, LONG.

Winter jacket with lightweight lining and high insulating effect

19835 has been designed with a lightweight lining and a high insulating effect, making the jacket both light and ultra comfy to wear. There's room for a 9.4-inch tablet, and the jacket also has a hood: 19144-217 or 19044-217.

MASCOT® MULTISAFE | Winter Jacket with quilted lining and breathable, wind and waterproof

Product number: **19835-217**

55% modacrylic/39% cotton/5% polyamid/1% carbon fibre - 320 g/m²

Certified to EN ISO 11612 (A1, A2, B1, C1, E1, F1), EN ISO 11611 - class 1 (A1, A2), EN 1149-3, EN 1149-5, IEC 61482-2 class 2, ATPV - 28,2 cal/cm² (tested in accordance with EN 61482-1-1 and EN 61482-1-2), EN 13034 + A1 (type 6), EN ISO 20471/A1 - class 2 (XS), EN ISO 20471/A1 - class 3 (S-4XL), EN 343 + A1 - class 3/1 and EN 342:2017 class 3/WP (2,00 clo).

Size: XS-4XL

- Breathable, wind and waterproof with taped seams.
- Anti-static, acid-resistant and flame-retardant.
- Dirt repellent.
- Form cut sleeves with great freedom of movement.
- Interior zipper at lower back for logo printing / embroidery.
- Extra protection against the cold with an extended back.

17010

Certified visible and safe

Approved according to the international norm EN ISO 20471 which imposes requirements on visible workwear for employees in high-risk areas. The fluorescent material keeps you visible in daylight and the reflectors with the highest reflectivity make you visible in the dark. The material has a dirt-repellent surface that prevents the clothes from getting dirty to keep you visible for a longer period of time.

Functional pockets and details

The jacket has two breast pockets, one of which has a flap and D-ring, and the other of which has a vertical zip, making it suitable for items such as a phone. Alternatively, you could store your phone in the protective zip pocket under the storm flap, which can be opened without undoing the jacket. This pocket can hold a tablet of 9.4 inches. The front of the jacket has front pockets with zip fastening and a strap for a gas alarm. All pockets and stitching are designed so that embers etc. don't remain on the clothing.

Windproof, waterproof and breathable

The jacket is breathable, wind and waterproof, and approved in accordance with both the EN 343 standard for protection against rain, and the EN 342 standard for protection against cold. With an extra high collar, extended back and close-fitting rib on the wrists, it really helps keep the cold out. The jacket is insulated with a quilted lining.

Multi-protective fabric

This product gives you multiple protection. Not only is the product certified as anti-static, acid-resistant and flame retardant (in accordance with EN 1149-3/EN 1149-5, EN 13034 + A1 (type 6) and EN ISO 11612 (A1, A2, B1, C1, E1, F1) respectively), it also protects against light arcs and occasional welding (in accordance with IEC 61482-2 cl. 2 ATPV - 28,2 cal/cm² (tested according to EN 61482-1-1 and EN 61482-1-2) and EN ISO 11611 – cl. 1 (A1 + A2)).

Individual adjustments

When wearing winter clothing, the ergonomics and freedom of movement are important. With this jacket you get form cut sleeves with great freedom of movement for an active workday. In addition, you can adjust the jacket to make it suit you perfectly. The cuffs and the lower back can be adjusted with press studs.

17010

MASCOT® Renens | Winter Trousers with quilted lining and removable braces, waterproof, multi-protective

Product number: **13892-217**

55% modacrylic/39% cotton/5% polyamid/1% carbon fibre - 320 g/m²

Certified to EN ISO 11612 (A1, A2, B1, C1, E1, F1), EN ISO 11611 - class 1 (A1, A2), EN 1149-3, EN 1149-5, IEC 61482-2 class 2 (tested in accordance with EN 61482-1-2 / tested in accordance with IEC 61482-1-1 (ATPV - 24 cal/cm²), EN 13034 (Type 6), EN ISO 20471 - class 2, EN 343 - class 3/1 and EN 342:2017 - kl. 3/WP (1,99 clo).

Size: S-4XL

- Breathable, wind and waterproof with taped seams.
- Anti-static, acid-resistant and flame-retardant.
- Dirt repellent.
- Higher back provides both support and warmth.
- Adjustable kneepad pockets so kneepads can be optimally placed on the knee.
- Co-certified for use with MASCOT kneepad type SHORT or LONG, as the kneepad pocket is height-adjustable.

Certified visible and safe

Approved according to the international norm EN ISO 20471 which imposes requirements on visible workwear for employees in high-risk areas. The fluorescent material keeps you visible in daylight and the reflectors with the highest reflectivity make you visible in the dark. The material has a dirt-repellent surface that prevents the clothes from getting dirty to keep you visible for a longer period of time.

Protect your knees

If you often work on your knees it is important to protect your knees – also when you work in multi-protective workwear. The kneepad pockets in these trousers can be adjustable so the kneepads can be optimally placed on the knees. The knee pads are inserted from above and the kneepad pockets are closed with flap and hook and loop fastening so dirt and sparks won't get in.

Windproof, waterproof and breathable

The winter trousers are breathable, wind and waterproof, and approved according to EN 343, protection against rain, and EN 342, protection against cold. The waistband is higher at the back, to better protect against cold. The braces can be removed and have a lined piece at the back.

Multi-protective material

This is a multi-protective product as it is certified anti-static, anti-acid and flame-retardant (respectively EN 1149-3/EN 1149-5, EN 13034 (type 6) and EN ISO 11612 (A1, A2, B1, C1, E1, F1)). It also protects from electric arcs and occasional welding arcs (respectively IEC 61482-2 class 2 (tested in accordance to EN 61482-1-2 / tested in accordance to IEC 61482-1-1 (ATPV - 24,0 cal/cm²)) and EN ISO 11611 - class 1 (A1, A2)).

All necessary pockets and details

On the outside of the legs you will find a hidden zip with storm flap that makes it easy to use the trousers when wearing boots. The winter trousers have otherwise the same details as your workwear: Back pockets, D-ring, thigh pocket with phone pocket and ruler pocket.

Anti-static, chemical protective and flame-retardant

In MASCOT's assortment you will find a number of products that are anti-static, chemical protective and flame-retardant, but with a slightly lower level on some of the certifications compared to the products on the previous pages. Find the products here and on the next two pages.

010

MASCOT® Baar | Boilersuit with kneepad pockets, multi-protective

Product number: 06619-135

87% cotton/12% polyamide/1% carbon fibre - 320 g/m²

Certified to EN ISO 11612 (A1, B1, C1, E1), EN ISO 14116 (index 3/50x75°C), EN 1149-3 and EN 1149-5, EN 61482-1-2 (Class 1) / tested in accordance with IEC 61482-1-1 (ATPV - 18 cal/cm²), EN ISO 11611 (Class 1 A1) and EN 13034 (Type 6).

Leg length and size: 82 cm: C 44-C 66

- Anti-static, acid-resistant and flame-retardant PyroPro®.
- Teflon® finish makes the product dirt resistant and ensures high visibility.
- Durable triple stitched seams that extend the product life.
- Fastening with storm flap and hidden press studs, so as not to scratch the surroundings.
- Adjustable kneepad pockets so kneepads can be optimally placed on the knee.
- Seams face downwards so sparks can not get lodged in them.
- Co-certified for use with MASCOT kneepad type SHORT or LONG, as the kneepad pocket is height-adjustable.

MASCOT® Ternitz | Shirt, multi-protective, modern fit

Product number: 09004-142

99% cotton/1% carbon fibre - 185 g/m²

Certified to EN 1149-5 and EN ISO 11612 (A1, B1, C1). Fabric is Pyrovatex® treated and meets the demands of EN ISO 14116 (index 3/5x60°).

Collar size: 37/38 cm - 49/50 cm

- Great protection with anti-static and flame-retardant properties.
- Modern, close fit with great freedom of movement.
- Hidden press stud fastening.
- Band on arm for fixing a gas alarm, for example.

MASCOT® Freiburg | Bib & Brace with kneepad pockets, multi-protective

Product number: 06669-135

87% cotton/12% polyamide/1% carbon fibre - 320 g/m²

Certified to EN ISO 11612 (A1, B1, C1, E1), EN ISO 14116 (index 3/50x75°C), EN 1149-3 and EN 1149-5, EN 61482-1-2 (Class 1) / tested in accordance with IEC 61482-1-1 (ATPV - 18 cal/cm²), EN ISO 11611 (Class 1 A1) and EN 13034 (Type 6).

Leg length and size: 82 cm: C 44-C 66 • 90 cm: C 44-C 66

- Anti-static, acid-resistant and flame-retardant PyroPro®.
- Teflon® finish makes the product dirt resistant and ensures high visibility.
- Durable triple stitched seams on leg and crotch extend product life.
- Adjustable fabric straps, with short strong elastic.
- Adjustable kneepad pockets so kneepads can be optimally placed on the knee.
- Seams face downwards so sparks can not get lodged in them.

Workwear symbols

Next to each product in this catalogue you will find a number of symbols. They offer you a quick overview of the product's properties. On this page, you can read more about, what the headline in the symbol covers.

Breathable

Breathability in waterproof/water-repellent clothing is especially important if you sweat while working in cold environments. If you do not get rid of the moisture, there is a great risk that your wet clothes will get cold and you will freeze as a result.

Stretch Zones

The trousers are very comfortable to wear because of the stretch zones that are placed where you need extra flexibility in an active workday. The stretch inserts, especially around the knees and the lower back, lead to increased freedom of movement, particularly when working on your knees.

Windproof

When your clothing is windproof you hold heat more easily. Choose products with this symbol when you don't want the wind to disrupt your everyday comfort.

Insulating

This symbol on clothing indicates that you have a product that helps to keep you warm when the surroundings are cool.

Waterproof

100%. This symbol is your assurance that MASCOT does not allow as much as a single drop of water penetration. Zippers are waterproof and seams are taped on the back.

Stain resistant

Your fluorescent clothing keeps you visible, but it must be kept clean to be seen, which is not always easy. MASCOT helps to keep your clothing dirt free with a stain-resistant treatment. When your clothes are stain resistant, you will be more visible and therefore safer for longer.

Water-repellent

Clothes carrying this symbol are made of waterproof material. However, it is not possible to put tape on the back of the seams of certain fabrics. Therefore the product cannot be classified as being entirely 100% waterproof, just water-repellent.

Lightweight

The symbol indicates that the workwear is light in weight. The garment remains highly durable. You should choose products carrying this symbol if you want durable workwear in a light fabric, for example if you work indoors and/or in hot environments.

Moisture wicking

Most fabrics can absorb sweat, but some materials can do more than that – particularly, transport sweat away from your body so you do not experience wet and cold to your innermost layer. A moisture-wicking innermost layer is crucial.

Ergonomic fit

All of MASCOT's clothes are, of course, designed for movement. But if you have a particular need for clothing that supports, assists and just plain fits, in all body positions, then go for the ergonomic fit.

Ultimate Stretch

Products with this symbol are made with four-way stretch. The stretch material is flexible in all directions giving you an extraordinary freedom of movement. Products with four-way stretch are soft and comfortable to wear and follow your every move providing extra comfort for your work day.

Modern fit

Most of MASCOT models have a normal, comfortable workwear fit. Recently, we have experienced a higher demand for a slimmer fit. Look for this symbol, if you require clothing to sit a little closer to the body.

Classic fit

Select products with the Classic Fit symbol if you are looking for products with extra width. The products with Classic Fit are the most spacious in the MASCOT range.

Kneepads

If you already use kneepads, then you know how important comfort is in your workday. MASCOT's kneepad pocket design ensures that the kneepads sit perfectly every time you kneel.

Ladies fit

Products with this symbol are designed according to MASCOT's women's fit. The clothing gives you a comfortable and thoroughly tested fit, with great freedom of movement.

Reflective

Small reflective strips on your clothing can be crucial to your safety. Regardless of where you work, traffic can be a factor. In this environment, reflectivity increases your chance of being seen.

DIAMOND fit

DIAMOND is a ladies' fit. This fit is, as a general rule, designed for women with a difference of more than 20 centimetres between their waist and hip measurements. If there is a difference of less than 20 centimetres, then the PEARL fit is preferred. We always recommend that you measure the circumference of hip and waist and use the measuring chart to find the optimal size.

Magnet

Magnets allow for the easy closure of, e.g. breast pockets or for retaining screws and bits in hanging pockets. People with pacemakers or an ICD should not use products fitted with magnets. Magnetically sensitive items should also be kept well away from magnets.

Triple Seams

Triple stitched seams are your guarantee for high wear resistance. MASCOT places them on your clothes most exposed areas, such as the shoulders and the outside and inside of the leg, prolonging the wearability of your clothing.

Recycled polyester

Recycled polyester is made from e.g. recycled plastic bottles and other plastic waste, which has been collected and broken down into granulate and spun into new threads. These threads are used to produce textiles. This converts waste into a new resource, which can then be used for producing textiles.

Holster pockets

An indispensable feature for anyone using nails, screws and bits. Select a version with magnets at the top so you do not have to dig down into your pocket every time you need to grab something. Holster Pockets can also be purchased separately.

Should your product be Premium or Basic?

PREMIUM

Premium – high quality products for repeated use

The material's high quality makes a difference in Premium products. They are made of combed Vortex-spun yarn which keeps them looking good without pilling. The Premium products are also very colourfast so they won't change colour due to sunlight or sweat, which makes them an obvious choice for outdoor use. Choose Premium products if you want T-shirts that retain their premium look and are comfortable to wear even after repeated use and washing.

BASIC

Basic - many colours at a low price

The Basic products are suitable for indoor use. They are generally lower in weight than Premium products.

Certifications and labels

We certify MASCOT products according to international standards, norms and labelling. Some of them are standards for safety workwear that you and/or your employer, must ensure your workwear has. Others, such as Oeko-Tex®, are things MASCOT has chosen to apply for on the products, so you can quickly get an overview of, and find peace of mind in the fact that the products meet the strictest requirements.

In general, MASCOT invests in many norms for each product in order for us to document that the products comply with high international standards.

EN ISO 20471

EN ISO 20471 – High visibility clothing

This class designation (the X next to the symbol) indicates the class in relation to how well the product is able to offer protection. The highest class that can be achieved is class 3. In EN ISO 20471, all reflectors must meet the requirements for class 2 with regard to the reflector's ability to reflect light. If the manufacturer so desires, combined outfits can be classified according to a higher protection class than the one given to a single garment used on its own. The possible higher class is specified on the label of the garment. Clothing that is certified in accordance with this version is tested after washing. Unless otherwise stated on the clothing label, the material has been tested after five wash cycles.

EN 13758-2 – Properties that protect against UV rays

A product certified according to EN 13758-2 provides documented protection against the sun's harmful UVA and UVB rays. The products are labelled with an Ultraviolet Protection Factor (UPF value), which corresponds to the protection capability. A label with, for example, a UPF 20+ factor indicates that a maximum of 1/20 of the sun's harmful rays penetrate the clothing. This means that, thanks to the clothing, you can expose the protected skin to the sun's rays 20 times longer than you would without protection. The protection capability is reduced if, for example, the product becomes worn, if the care instructions are not followed or if the clothing becomes wet. The highest UPF label that the clothing can carry is UPF 40+, which corresponds to a maximum penetration of 2.5% of the sun's harmful rays.

EN ISO 11611

EN ISO 11611 – Protection when welding

This standard specifies the minimum requirements for protective clothing used when welding or performing similar processes with comparable risks. There are two classes, 1 and 2, with class 2 being the highest (= the best level of protection).

EN ISO 14116 – Protection against heat and flames

This standard specifies the performance requirements for materials, material combinations and items of protective clothing with limited flame spread properties in order to reduce the likelihood of the clothing catching fire and thereby constituting a hazard.

EN ISO 11612

EN ISO 11612 – Protection against heat and flames

Clothing that protects against heat and flames. This standard describes coveralls made from a flexible fabric which are designed to protect the user's body (but not the hands) from heat and/or flames. With the exception of hats and gaiters, garments for the protection of the head, hands or feet are not covered.

IEC 61482-2

IEC 61482-2 – Live working

Clothing that protects against the thermal hazards of an electric arc. IEC 61482-2 certification involves two test methods. The first test method (open electric arc) tests the fabric and garment in order to determine the ATPV/EBT value of the clothing. The second method (box test) determines the electric arc protection class of the fabric and the garment through the use of a forced and controlled electric arc. There are two different classes, with class 2 being the highest and offering the best protection.

EN 1149-3/5**EN 1149-3 / EN 1149-5 - Protective clothing with electrostatic properties**

Here, you can read about protective clothing with electrostatic properties. The EN 1149-5 (testing method 1149-3) certification is for your safety.

EN 1149-3:2004 – Electric discharge

This standard describes the breakdown of electrostatic charges from the surface of the clothing materials.

EN 1149-5:2008 – Performance requirements for materials and design requirements

This standard describes the requirements for the materials and design of electrostatic dissipative protective clothing which is used as part of a grounded system to prevent incendiary discharges.

EN343

Y
Y
X

EN 343:2019

When there's a job that needs to be done whatever the weather, it's important to be properly dressed. EN 343 is used to add different values to clothing that protects against the rain. Next to the symbol are three values. The first number indicates the water tightness, and the second number refers to the breathability of the overall product. Both values are divided into classes from 1-4, with 4 indicating the highest class. The lowest value is an optional test of the finished product to test the impact of rainfall from above. R indicates that the product has been tested, X indicates that the product has not been tested.

EN342

3
WP

EN 342

The best way to protect yourself from the cold is to use workwear that is certified in accordance with EN 342:2017. In order to obtain maximum protection, your workwear should be kept dry and tight around openings, such as the wrists, for example. You will also need to wear gloves and a hat, etc, in order to avoid local cooling. Each individual product is classified in accordance with different values: thermal insulation value (Y), degree of air permeability (AP) and, if applicable, waterproofness (WP).

EN343

X
X
X

EN 343

When there's a job that needs to be done whatever the weather, it's important to be properly dressed. EN 343 is an European standard for protective clothing. Look for EN 343 certification if you want to be guaranteed comfort even when it's windy and raining. You will find two values beside the symbol for EN 343. The first number indicates waterproofness. The second number describes the breathability of the overall product. Both values are divided into classes from 1-3, with 3 indicating the highest class in both cases.

EN 13034**EN 13034 – Clothing that protects against liquid chemicals**

EN 13034/EN 13034 + A1. This standard describes the performance requirements for chemical protective clothing that provides limited protection against liquid chemicals (type 6 and type PB [6] equipment). Chemical protective clothing with a limited performance ability is intended for use in the event of potential exposure to low volume splashes, fluid dispersion or spray with low pressure and volume.

ProWash®**ProWash®**

ProWash® is MASCOT's term for products that tolerate industrial washing and drying. It is the label to look for when you need products that tolerate industrial washing.

MASCOT's assortment includes products that are tested according to the methods recommended in EN ISO 15797, and are washable at up to 85 degrees. The assortment also includes products that tolerate industrial washing at up to 60 degrees.

**Oeko-tex®**

MASCOT's products are Oeko-Tex® Standard 100 labelled. The Oeko-Tex® Standard 100 is the world's leading health label for textiles. By providing Oeko-Tex®-labelled clothing, employers ensure that their employees are not subjected to chemicals and colourants that are harmful, or presumed harmful, to their health.

Find the correct size

The right size is crucial for the workwear's functionality, and for your comfort and safety. In MASCOT's assortment, many products have a fit that can be used by both men and women. In addition, you will find MASCOT products that are especially designed for women, as well as an assortment for children.

To find the right size, and get the most accurate measurement, we recommend that someone else measures you. Take the measurements close to the body. Also remember to measure your leg length. In most of MASCOT's trousers, you can choose between three leg lengths.

If you're a woman, you have several options

Many of MASCOT's ranges are available in one or more ladies fits. If you choose a product for women, please ensure you measure according to the ladies fit and the sizes form for women. Some of the men's products also fit women. If you pick a men's product, the measurements must be taken from the men's fit and sizes form for men.

Measurements for men's fit

Measurements for ladies fit

H. Head measure

Measure the circumference of the head.

P. Collar size

Measured around the neck – 1 cm above the collar bone.

A. Chest

Measured around the widest part of the chest.

K1. Waist size

Measure the waist size just above the navel. You need to tighten the measuring tape.

K2. Waist size

Measure the waist size just below the navel. You need to tighten the measuring tape.

K3. Waist size

Measure the narrowest point of your waist. Your waist size is used together with your hip size to find your fit – DIAMOND or PEARL.

L1. Hip size

Measured around the widest point of the hips.

L2. Hip size

Measured with legs together around the widest point of the hip. In MASCOT's products for women, it is the hip measurement that determines which size to choose.

E. Inner seam

The length is measured on the inside of the leg from crotch to floor (barefoot).

T. Height

Your full height.

Try the clothes on!

In that way, you are sure that the clothing fits as it should.

How to find your size in the measuring chart

For example: You are looking for trousers with a low waist.
Your waist measurement (K2) is 92 cm.
Find your measurement under K1/K2 in the chart. If your size fall between two sizes, you should choose the larger size.
In this example you should choose 93 cm and therefore the size C52. Remember also to measure your leg length before you order.

Women's trousers in the MASCOT® SAFE range come in the DIAMOND fit.

Two steps to help you find trousers that are just right for you:

1) Find your fit

Your MASCOT fit will depend on a combination of your waist size (the narrowest part) and your hip size (the widest part). The general rule of thumb is that if there is a difference of more than 20 centimetres between your hip and your waist then you should opt for a DIAMOND fit.

2) Find your size

You can find your size by measuring the circumference of your hip at its widest point. Keep your legs together when measuring hip width. Determine your size based on the circumference of your hip.

Ladies trousers and skirts

DIAMOND fit: A difference between waist and hip measurements of more than 20 cm.

MASSCOT

Sustainable production

The vast majority of MASCOT's products is produced in the company's own factories, where production is conducted efficiently and with great respect for the environment and people.

MASCOT takes its responsibility for the environment and people seriously

MASCOT strives to create sustainable solutions throughout the entire production chain. As a global textiles company, we have an enormous responsibility to safeguard the people and the environment at our production sites and throughout the rest of our supply chain. This is a responsibility that we take very seriously.

The 17 sustainability goals describe a number of global challenges. These commit all UN member countries to strive towards achieving the goals. The global goals are interdependent and balance the three dimensions of sustainable development: economical, social and environmental development.

The 17 global goals

The UN has formulated 17 global goals for sustainable development, which it expects all countries, companies and organisations to meet by 2030. The 17 global goals are common points of orientation, so that all players can realise the global need for business solutions that can help create a sustainable future for the generations to come.

MASCOT and the global goals

MASCOT works with all of the 17 global goals at different levels, and we will continue to develop and intensify our work in this area towards 2030. As part of our workwear production, we want to help eliminate poverty and hunger, ensure health and education for all, and provide decent jobs, among other things. Read more about how we do this on the following pages.

Decent jobs bring people out of poverty

Eliminate poverty

MASCOT manufactures clothing in countries where poverty is a challenge in some areas. By providing decent jobs and corresponding pay, we help raise the standard of living in these areas. MASCOT therefore makes a significant socio-economic contribution to developing the poverty-stricken local areas that our employees come from.

MASCOT is constantly expanding our production in Laos, so that we can employ more people and thereby further contribute to the socio-economic development in these countries. We tend to recruit our factory employees from the surrounding and often poverty-stricken villages. To reduce our employees' costs and increase their personal safety, MASCOT also provides daily transport between the factories and their villages.

Gender equality

The 5th global goal focuses on ensuring gender equality, and on ensuring that women's and girls' rights are strengthened globally.

More than 2,400 of MASCOT's employees work outside Europe, where gender inequality in society tends to be the greatest. Gender inequality here is noted in areas such as health, co-management and business activity.

At MASCOT's factories in Vietnam, 86% of employees are women. In MASCOT's Laos factories, 81% of employees are women. MASCOT's policy is naturally for all employees to have the same opportunities, just as it is always the best qualified people who are employed, regardless of gender. With a majority of female employees, we reduce gender inequality, as business activity helps increase equality. Access to the company's free medical clinic also means that women's access to better health is increased.

Decent jobs and economic growth

MASCOT invests heavily in innovation and market development. Both of these generate growth, which results in further productive employment as MASCOT's investments are made in both technology and management systems. This also applies to our production in Vietnam and Laos.

Salaries for MASCOT's employees in Vietnam and Laos are increasing far more, year on year, on a percentage basis, than salaries in Europe. This means that MASCOT not only helps reduce inequality across borders, we also help to generally increase the level of pay in those areas where we have factories. And with the good working environment that we offer our employees, we also increase the working conditions in the local area in general, as otherwise employers in the region would lose their employees. We create decent jobs and thereby give other players in the local area an incentive to do the same.

Healthy employees

When you set up production facilities in developing countries, you have an obligation to increase health, wellbeing and safety for employees. Or at least that is how MASCOT sees it. That is why MASCOT provides free access to medical assistance and health information, as well as a free nutritious lunch for all employees.

Free lunch

Every day, MASCOT employees sit down to lunch and get a good, nutritious meal. MASCOT's doctors and nurses work closely with the chefs, and food samples are taken every day in order to ensure high levels of quality and to ensure a sufficient calorie content. MASCOT's lunch helps increase food safety and to improve the standard of nutrition for employees.

Happy and healthy employees are good employees

MASCOT has around 2,400 employees in Southeast Asia working in a European work culture and with MASCOT's strong values. This results in safe, secure and decent workplaces with huge development potential for MASCOT's employees. The employment contract also includes access to a free medical clinic, health information, training in safety, and a good, free lunch.

Healthy and happy employees have energy for their job. This is noticeable in the production in Vietnam and Laos. Just like the European MASCOT employees, they are dedicated to the mission of creating the world's best workwear - based on durability in both production quality and in socially responsible production.

Free access to doctors and healthcare staff

All employees at MASCOT's factories can visit MASCOT's state-certified health clinics on a daily basis. The doctors and nurses don't just provide treatments. They also provide preventative healthcare and create information campaigns on various health topics. They also work on creating a positive mental working environment.

Responsible production

Durable products are sustainable products

Responsible consumption is, for example, buying products that last a long time, to avoid frequently buying new products and using new resources. This also applies to workwear.

MASCOT only offers products that have been tested for long-term use. This applies to everything from fabric and reinforced seams to extra reinforcement in areas that are particularly subjected to wear and tear. We produce clothes in our own factories and can therefore guarantee 100% quality control. All this means that MASCOT's products last a long time. And this has a major impact on the sustainable balance sheet.

To ensure quality, many of the fabric types have undergone a thorough course of testing, such as wear tests, tear strength tests and break tests. High quality is at the core of MASCOT's DNA. MASCOT's slogan and consistent work method has always been TESTED TO WORK.

Recycled resources

Many resources are used in the world's industries, but there will not always be an endless supply of new resources. That is why we need to focus on using recycled materials - waste and used materials - that can be recycled. That's what we do at MASCOT.

All of MASCOT's padded lining is made using a large amount of recycled polyester. MASCOT also has a large range of T-shirts, polo shirts and sweatshirts made from recycled plastic, which has been transformed into new polyester yarns. Other products are made from organic cotton, which means that the cotton is grown without the use of pesticides or sprayed chemicals.

Not all products are made from recycled materials, as in some areas this can affect, for example, wear resistance, quality or colour. However, a large part of the packaging comes from recycled materials. At MASCOT, cardboard boxes, paper and a new generation of plastic product bags are either wholly or partly made from recycled materials.

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

Responsible consumption and production

Economic growth and sustainable development require that we show due care and diligence when using our products and resources. We must ensure that our consumption and the way we produce our clothes around the world are done responsibly and with respect for current and future people and the environment.

Minimising waste, energy consumption and rubbish in production

Sustainable production also includes limiting waste, rubbish and emissions. Producing clothing is a comprehensive and global process. There are many stages involved.

Fabric and other raw materials

We work with all suppliers towards a general reduction in the use of chemicals and water. We also choose suppliers based on their environment profile. Most of our piece goods come from suppliers that have both Bluesign® and are ISO 14001 certified. We are also striving to convert part of the dyeing process to dyeing without or with only minimal use of water.

Own production

MASCOT has a great advantage in that we produce the majority of our products ourselves. 75% of all products are made in our own factories, where we control the processes. MASCOT's factories are located in official, established industrial zones that have been approved by the state ministries in Vietnam and in Laos. All have a comprehensive environment policy and ongoing control of waste management. Wastewater treatment is undertaken by the industrial zones and monitored by environmental agencies. Inspections are made quarterly. MASCOT sorts and registers all waste and as much as possible is collected with recycling in mind. Fabric off-cuts from production are heavily minimised and are also sorted and recycled. MASCOT also has a policy around sustainable climate impact that applies to its own factories, and initiatives are regularly being launched to reduce the production's impact on the environment.

CSR-certified production

MASCOT's production is certified according to the most comprehensive certification within CSR – SA8000.

The vast majority of MASCOT's products – from our winter clothing to our workwear – is made at our very own factories. When many millions of quality products need to be produced each year in an effective production chain, there is a definite need for skilled and dedicated employees. That is why we have our own, experienced HR departments, both in Vietnam and in Laos. Since we recruit all of our employees ourselves, we can guarantee compliance with the minimum age

limit for full time work and ensure that there is no child labour at our factories. All employees have good employment conditions with good salaries, and there is complete transparency with regards to remuneration and bonuses. Any overtime hours are reported in advance and remunerated in accordance with higher percentage rates. Employees naturally have freedom of association and the right to collective bargaining.

Companies that achieve SA8000 have, for example:

No child labour

No forced labour

A good working environment adapted to local conditions

Reasonable working hours and wages

The right to organise

No discrimination

An effective management system for control of subcontractors' employee relations

Health and Safety

Read more about SA8000 here: www.mascotworkwear.com/en/sa8000

No one can solve the global challenge alone

Partnerships for the goals

The 17th global goal is about partnerships. No one can solve the global challenge alone. It requires collaboration and forward-looking partnerships.

MASCOT already has a long line of established partnerships with stakeholders in our production countries. We collaborate with ministries and governments, just as we collaborate with organisations that work with the textile industry, so that together with other stakeholders we can promote both social and environmental conditions in the world's textile-producing countries.

MASCOT is constantly building new partnerships. For example, we are currently working on partnership with several different players in the value chain, to invest with them in new technologies that can create a more sustainable and rational production.

MASCOT is a member of the Fair Wear Foundation. Together with around 100 other textile producing companies, MASCOT strives via Fair Wear to increase social responsibility in all textile-producing factories around the world.

Highly automated logistics centre

When you buy one of our products, you also get security of supply and efficient service. MASCOT stocks all products in all sizes and colours, so you won't have to wait long for the products you want. We process orders within 24 hours from when you place your order and dispatch all products as quickly as possible. Our highly modern and automated logistics centre makes sure that all orders are sent out fast and flawless.

MASCOT® SmartStore

MASCOT® SmartStore is an online logistics and ordering system. The system is developed to make your order management as fast and problem-free as possible. It is adapted for each company's product range and needs within workwear and personal protective gear. Contact your local MASCOT distributor to get started right away.

Global Workwear Solution

MASCOT offers a seamless workwear solution for multinational companies, across borders. If your company employs more than 1,000 workwear users internationally, you'll get all the benefits of having only one contact point at MASCOT.

Save time and money on administration with a global agreement

Do you run your business activities across borders? At MASCOT, we can simplify your workwear purchasing process and offer one solution for your company – globally.

MASCOT manages your global workwear solution

- Fast, flawless worldwide delivery - with minimal administration
- Worldwide central project management - with one contact point
- A distribution network across Europe as well as resellers around the globe
- Uniformity in quality, products and services

MASCOT®

LogoService

Printing and embroidery

MASCOT can provide printing and embroidery as an integrated part of your workwear order. Whatever solution you choose, adding a printed logo or a piece of embroidery to your order is really simple. We process all printing orders quickly and effectively, making sure that your employees receive their custom-branded clothing within good time.

Individual product customisation

— more than a standard assortment at your disposal

Do you have a large company with individual needs that aren't covered by MASCOT's standard assortment? Then you have the possibility for a customised MASCOT solution for your employees. You might need special sizes, an extra pocket for certain tools, or another fabric or colour. Or maybe you need one or more new product types or styles. Everything is possible, and our experts are at your disposal, so together, we will find the solution that suits you best.

At MASCOT, we categorise the many types of individual product customisations in terms of how extensive the changes are. For certain special order products, we have a minimum number of products you need to order, and the delivery time is of course also longer than with our standard assortment. This is agreed individually from order to order.

Do you need special orders or other individual customisations? Call your contact from MASCOT or your distributor. He/she can help you get just the workwear to match your needs.

MASCOT – a quick, easy and quality conscious choice

It is easy to do business with MASCOT. You have an entire assortment of workwear and safety footwear at your disposal – from head to toe and for all seasons. You only need to shop in one place, and you'll get international support all over the world. In addition, you can automate many aspects of your trade with MASCOT, as you wish.

It is also quick to do business with MASCOT. We offer user-friendly, online ordering platforms that will save you time and minimise errors. We process orders from all over the world within 24-48 hours from a fully automated, ultramodern logistics centre with a continuous inventory of more than 5 million products. Flawless and fast – and, if you wish, we can man-pack the workwear.

If you choose MASCOT, you also make a quality conscious decision. It is not just that the workwear and safety footwear are thoroughly tested and of the

highest quality, it is also that MASCOT offers you the most efficient ordering and service solutions. Last but not least, it means that when you buy products from MASCOT, you know they are manufactured under good working conditions. The vast majority of MASCOT's products are manufactured on our own CSR-certified factories in Vietnam and Laos. We guarantee good working conditions – and socially responsible workwear.

When you do business with MASCOT, you do business with a company that continuously develops its products, services and solutions. We constantly focus on the opportunities and limitations of our customers and potential customers. These inputs are the focal point in the development of new products and solutions from MASCOT. We will be one step ahead to deliver the best solutions to our customers because that means our customers also are a step ahead.
